CALIFORNIA STATISTICAL ABSTRACT

California proudly presents the annual measure of its growth in this, the seventh, Statistical Abstract. The story told in this volume is a story of growth unmatched anywhere in the United States. It tells of this State's growth in population, personal income, business and industry—in short, all the economic elements of the California success story. These figures tell still another story to those who read them carefully. That is the story of the growth in personal opportunity which is the goal for which we strive now and in the future.

PREFACE

The 1966 edition of the *California Statistical Abstract* presents selected statistical data available on the State and its geographical subdivisions. Several major changes have been made from the 1965 edition. The sections on public health, mental hygiene, crime, criminal justice and delinquency, and social insurance and welfare, which appeared in the 1965 *Abstract,* have been combined under the heading "Health and Welfare." A new chapter, "Resource Industries", includes the data previously given under water, agriculture, fishing, forestry, and minerals. The section "Income and Prices" covers both business (corporate) and personal income, as well as the consumer price index. "Transportation" now encompasses foreign trade. Additional tables have been added on public utilities and air traffic, and on census data relating to manufacturing, mining, wholesale and retail trade, and services.

The *Abstract* has been generally reorganized to present the various subjects in an order which, it is hoped, will be more convenient for the reader.

In a number of the tables some of the historical data have been deleted. Information for earlier years for many of the tables may be found in the 1965 edition of the *Abstract.* The present edition is intended as a more compact volume which will nevertheless fill the need for a basic compilation of statistical material on California.

Additional data are available on the various subjects covered. Persons wishing specific information not presented here are invited to write directly to the agency cited in the source. Addresses are given in the appendix on page 245. If no agency source is noted for the information desired, readers are invited to send their request to

Department of Finance
Budget Division
Financial Reserch Section
Room 1197
State Capitol
Sacramento, California 95814.

Requests will be forwarded to the appropriate agency for reply.

The Department of Finance welcomes comments on the present edition, and sugggestions for changes which will make the *Abstract* even more useful in future years to persons interested in the California situation.

INTRODUCTION

California covers an area of 158,693 square miles between the 32nd and 42nd parallels north latitude on the Pacific Coast. The State is well known for its temperate climate which has attracted millions of people to the coastal cities. Los Angeles-Long Beach ranks as the third largest metropolitan area in the United States, and San Francisco-Oakland as the sixth. Topographical and temperature extremes occur in the interior areas, however. California includes Mount Whitney, the highest peak in the contiguous United States, at 14,495 feet above sea level, and Death Valley, 282 feet below sea level, the lowest point in the Western Hemisphere. The average July maximum temperature ranges from 64 degrees in San Francisco to 107 in Imperial County. Overall, California has the largest population and personal income of any state, and is the leading agricultural state in terms of both variety and value of production. California is one of the leading industrial states of the Nation, and the first in defense-aerospace manufacturing, research and development. The State's major cities, besides being centers of industrial activity, represent financial and commercial centers important to the entire West Coast. The coastal areas are given primarily to lumber and specialty crop production; the Imperial Valley to vegetables; and the large Central Valley to the major volume crops for which the State is known. The State is also the leading producer of goods for export to foreign countries.

POPULATION

The population of the State has doubled every 20 years since 1860. In recent years the increase has been at a rate of approximately 1,500 persons per day. In the last 10 years the civilian population increased on the average about 560,000 per year.

California's population as of July 1, 1966, was 19,195,000. This represented a gain of 469,000, or 2.5 percent during the 12 preceding months, a rate of increase more than twice that of the United States. As usual, migrants constituted the greater part of the increase. A net total of approximately 270,000 civilian residents moved to California between July 1, 1965 and 1966. The natural increase during the year amounted to 205,000. Until this year, net migration into California exceeded 300,000 every year since 1955, and last year accounted for approximately 62.6 percent of the State's civilian population gain. The number of persons moving to the State has exceeded the number departing by 2.0 million since 1960.

California is one of the most urbanized states in the Nation. At the time of the Census of 1960, only the District of Columbia, whose population was 100 percent urban, and New Jersey, with 88.6 percent, exceeded Rhode Island and California which were virtually tied at 86.4 percent urban. By contrast, 67.2 percent of the combined population of the remaining 47 states was urban.

As of mid-1966, approximately 60 percent of the State's population lived in the ten southernmost counties. Of these, Los Angeles, with 6,957,200 residents, is the most populous in the United States. California's second most populous county, San Diego, is also among the southern ten. With 4,408,300 people, the nine-county San Francisco Bay Area contained 23 percent of the State's population.

California has a smaller proportion of residents 65 years or older than does the United States as a whole, and somewhat larger proportion of the working ages from 20 to 65.

Department of Finance projections of population at five-year intervals through July 1, 2000, are as follows:

Year	*High*	*Low*
1970	21,675,000	21,652,000
1975	24,733,000	24,558,000
1980	28,025,000	27,548,000
1985	31,434,000	30,497,000
1990	34,864,000	33,302,000
1995	38,339,000	35,978,000
2000	41,939,000	38,595,000

PERSONAL INCOME

Personal income of California residents reached a record $60.0 billion in 1965, 11.3 percent of all U.S. income allocated by states. Per capita income, at $3,258, was 19 percent above the national average. Two-thirds of California's personal income is received in the form of wages and salaries. Receipts from this source amounted to $40.3 billion in 1965. Property income totaled $8.7 billion, 14.5 percent of all income, while proprietors' income was $5.9 billion or 9.9 percent. Transfer payment added $4.8 billion or 8.1 percent.

Manufacturing is the largest source of income, accounting for one-fourth of the total derived from participation in current production. Trade is second in importance, followed by the service industries and government. Relative contributions by each of the major economic sectors are shown below:

	Percent of total	
Total	*California*	*U.S.*
Manufacturing	25.2	30.4
Trade	18.2	17.4
Services	16.7	14.1
Government	16.0	13.6
Contract construction	6.8	6.2
Finance, insurance, real estate	5.9	5.2
Transportation, communications and public utilities	6.9	7.3
Farms	3.3	4.3
Mining	0.6	1.2
Other	0.4	0.3

LABOR FORCE AND EMPLOYMENT

California's civilian labor force averaged 7,262,000 during 1965, an increase of 200,000, or 2.8 percent, from 1964. During the past ten years the relative

growth in California's labor force has been more than twice that of the Nation—36.9 percent compared with 14.9 percent.

Average civilian employment in the State increased by 193,000 between 1964 and 1965 to reach a new high of 6,833,000. As employment increased less than the labor force, unemployment rose slightly. An average of 429,000 California workers were unemployed during the year, or some 5.9 percent of the labor force. This unemployment rate was slightly less than that for 1964.

California nonagricultural employment established a new record of 5,774,500 wage and salary workers in 1965. On the average, 190,000 more persons were working in nonfarm industries in the latest year than in 1964, a job growth of 3.4 percent. Annual employment in six of the nine major industry divisions—manufacturing, trade, government, services, finance-insurance-real estate, and transportation-communications-public utilities—reached new highs in 1965.

Average weekly earnings of manufacturing production workers increased to an all-time high of $123.83. Hourly earnings averaged $3.05, also a new record. These earnings figures were substantially above the national averages of $107.53 and $2.61, respectively. The factory work week in California averaged 40.6 hours.

MANUFACTURING

California is the Nation's second-ranked state in value added by manufacturing. In 1964, California, according to the Annual Survey of Manufactures, produced $18.3 billion in value added, approximately nine percent of the national total, and up from $17.2 billion in 1963. Industry detail is not yet available past 1963. In that year, some $2.7 billion was added by manufacturers of transportation equipment. Food and food product producers ranked second with $2.5 billion, while electrical machinery firms came third with $2.2 billion.

In 1963 California was first among the ten leading U.S. industrial states in the manufacture of food and kindred products ($2.5 billion), in lumber and wood products ($512 million), and in miscellaneous manufactures ($1.9 billion), and second in petroleum products ($497 million) and transportation equipment ($2.7 billion).

The Los Angeles-Long Beach Metropolitan Area accounted for approximately 52 percent ($8.9 billion) of value added by California manufacturers, and the San Francisco-Oakland Metropolitan Area for 15 percent ($2.6 billion). Nationally, only the New York and Chicago Metropolitan Areas exceeded the Los Angeles-Long Beach area in value added.

In 1964 expenditures for plant and equipment came to $1,029 million, approximately eight percent of the U.S. total. During 1963 the industries making the largest investments were food and kindred products ($142 million), transportation equipment ($158 million) and electrical machinery ($103 million). During the 1960–64 interval more than $4.4 billion was spent on all new manufacturing plant and equipment in the State.

CORPORATE INCOME

Net income of more than $4.5 billion allocable to California operations was reported by nearly 119,000 active banks and corporations operating in the State during 1964. Manufacturing industries, with earnings of $1.7 billion, accounted for 38 percent of the total. The public utilities group, with $929 million, was in second place, followed by finance, insurance and real estate ($736 million), trade ($708 million) and mining and oil production ($212 million).

FOREIGN TRADE

Exports moving through customs districts in the State do not necessarily originate in California, nor are imports necessarily bound for California destinations. The State, however, is a major producer of goods for export, and a major market for imports. A study made by the United States Department of Commerce shows that California in 1963 ranked first among all states in the value of manufactured exports and of agricultural products which were exported.

The leading export products in 1964 were machinery and vehicles, food, textile fibers and manufactures, and metals and manufactures. During 1965 almost $2.1 billion of exports for world trade moved through California customs districts, while nearly $2.0 billion of imports entered the United States via California, for a world trade total of $4.0 billion. The value of exports was 21.8 percent above the 1964 level. There was a 15.5 percent gain in imports into the State.

AGRICULTURE

According to the 1959 U.S. Census of Agriculture there were more than 99,000 farms in California and about 37 million acres of farm land. Between 1954 and 1959 the number of farms declined by 19 percent, the amount of farm land declined by 2 percent but the average size of farms increased by 21 percent.

California continues to be the Nation's leading agricultural producer. Cash receipts received by California farmers during 1965 totaled $3.8 billion, $42 million more than in 1964. Sales of all crops were an estimated $2.1 billion and accounted for 56 percent of total receipts. Livestock products earned $1.4 billion or 39 percent.

WATER RESOURCES

California has ample water to meet the State's present and foreseeable needs. However, 70 percent of the available supply is in the northern one-third of the State, while about 77 percent of the demand for water is in the southern two-thirds. The two major areas of water supply deficiency are in the San Joaquin Valley and Southern California.

The California State Water Project, authorized by the Legislature in 1959 with passage of the California Water Resources Development Bond Act, is designed to assist in overcoming this maldistribution of water supply. This project will complement the extensive

water development in California by the Federal Government and by local water agencies. These latter developments include such projects as the Central Valley Project of the U.S. Bureau of Reclamation and the Colorado River Aqueduct of the Metropolitan Water District of Southern California.

The California State Water Project will involve one of the greatest transfers of water ever made. When completed, it will include 17 dams, 25 power and pumping plants, and nearly 700 miles of aqueduct facilities. Water contracts for the delivery of 4,230,000 acre-feet annually have been executed with 32 contracting agencies from Plumas County in the north to the Mexican border. The project will provide water conservation and conveyance facilities to bring surplus waters from the north to the water deficient areas. First water deliveries to the San Joaquin Valley are scheduled for 1968 and to Southern California in 1971. The initial features, presently under construction at a cost of over $2.0 billion, are designed to meet demands for water throughout much of California until about 1990. Planning studies are currently in progress by the California Department of Water Resources and other water agencies to define additional works necessary to meet water demands beyond the year 1990.

At the general election in 1960, California voters approved the sale of $1.75 billion of general obligation bonds to assist in financing the California State Water Project. In the calendar year 1965, water project bonds in the amount of $200 million were marketed, bringing to $450 million the total sold thus far in furtherance of the project. Repayment will be from reserves obtained from the sale of project water, power and other services.

During 1965, construction extended from Grizzly Valley Dam in Plumas County to Castaic Dam on the south slope of the Tehachapi Mountains in Los Angeles County. At Oroville, most of the major contracts remaining to be let were initiated, with 19 new awards totaling $58 million being made during the year. Construction remained on schedule, with the exception of the Oroville Powerplant. The powerplant was plagued with labor and management problems, resulting in a delay of about nine months in awarding the completion contract. This delay affects initial power generation, but does not alter the original completion date. By the end of the year, the embankment in place at Oroville Dam was 37 million cubic yards or 46 percent of the required total.

The South Bay Aqueduct was completed to the terminal facilities just east of San Jose in June. The Santa Clara County Flood Control and Water Conservation District took its initial water delivery from the Terminal Facilities at the time of their dedication on July 1, 1965. The contract for construction of Del Valle Dam was advertised in late December of 1965. The dam is scheduled for completion by February 1969.

Activity along the California Aqueduct accelerated at a rapid pace during 1965, and by the end of the year two hundred miles of the aqueduct were under construction, one hundred miles more than in 1964. Contracts were in progress for the entire aqueduct mileage in the North San Joaquin and San Luis Divisions, as well as for a 34-mile reach in the South San Joaquin Division. Excavation of the intake channel and bowl for the Buena Vista Pumping Plant in the South San Joaquin Division was started and construction of the major preconsolidation features was nearing completion. The contract for construction of the four and one-half mile long Carley V. Porter Tunnel, the most southerly of the four tunnels in the Tehachapi crossing, was initiated, and the contract for driving the adit to the discharge line tunnels for the Tehachapi Pumping Plant was awarded.

METROPOLITAN AREAS

Much of the data in this *Abstract* are reported for metropolitan areas in addition to totals for counties and the entire State. There are now 14 standard metropolitan statistical areas in the State, the most recent—Salinas-Monterey—having been added to the list during the first part of 1966. The table below summarizes the metropolitan areas and the counties which they include. In addition, the map on page XIII shows the areas graphically.

Metropolitan Area	*County*
Anaheim-Santa Ana-Garden Grove	Orange
Bakersfield	Kern
Fresno	Fresno
Los Angeles-Long Beach	Los Angeles
Oxnard-Ventura	Ventura
Sacramento	Placer, Sacramento and Yolo
San Bernardino-Riverside-Ontario	San Bernardino and Riverside
San Diego	San Diego
San Francisco-Oakland	Alameda, Contra Costa, Marin, San Francisco, and San Mateo
San Jose	Santa Clara
Santa Barbara	Santa Barbara
Stockton	San Joaquin
Vallejo-Napa	Napa and Solano
Salinas-Monterey	Monterey

The metropolitan areas cover 43.8 percent of the State's area, and include 90.5 percent of the population, and approximately 92 percent of the nonagricultural employment. Statistics for the Salinas-Monterey area will be included for the first time in the 1967 *California Statistical Abstract.*

TOPOGRAPHICAL FEATURES

SECTION A.

AREA, GEOGRAPHY AND CLIMATE

This section presents summary descriptive data measuring the land and water areas of the state and describing the distribution of temperature and precipitation. The basic sources of these data are the federal agencies responsible for surveying and mapping the United States and for recording its weather. Information on federal and state parks and monuments is from inventories reported by various agencies.

Data given in Table A-13 on frost-free periods refer to the portion of each year during which the daily minimum temperature remains above 28 degrees Fahrenheit.

Plate A-1 shows the geographical pattern of precipitation throughout California, as indicated by lines of equal normal annual precipitation. These lines generalize records and estimates for a large number of weather stations in all parts of the state.

The introduction to Section G, Water, includes a generalized description of precipitation in California during the water year 1964–65.

TABLE A-1
AREA OF CALIFORNIA

Type	Square miles	Acres
Gross area of State	158,693	101,563,520
Land area[a]	156,537	100,183,680
Inland water[b]	2,156	1,379,840
Coastal water[c]	69	44,160

[a] Dry land and land temporarily or partially covered by water, such as marshland, swamps, and river flood plains; streams, sloughs, estuaries, and canals less than one-eighth of a statute mile in width; and lakes, reservoirs, and ponds less than 40 acres of area.

[b] Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth of a statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water; and islands having less than 40 acres of area. Does not include water surface of the ocean or bays.

[c] Water other than inland water. Much of the water adjacent to the State and falling under its jurisdiction does not belong to any particular county. The State area as shown above includes only the water which could be assigned to the counties and subdivisions of the counties. The definition adopted by the Bureau of the Census, characterizes this water as "inland water."

TABLE A-3

LAND AREAS, BY MAJOR CLASS OF LAND

January 1, 1965

Class of land	Acres
Total	100,207,000
Forest land	42,541,000
Commercial [a]	17,391,000
Productive-Reserved [b]	1,194,000
Unproductive [c]	23,956,000
Crop land [d]	12,966,000
Urban and suburban land [e]	2,068,000
Other land	42,632,000

[a] Forest land which is producing or capable of producing crops of industrial wood and not withdrawn from timber utilization by statute or administrative regulation.
[b] Productive public forest land withdrawn from timber utilization through statute or administrative regulation.
[c] Forest land incapable of yielding crops of industrial wood because of adverse site conditions.
[d] As reported by 1959 Census of Agriculture. Excludes land cultivated in developing improved pasture.
[e] Residential areas containing at least 5 homes, with a density of one home or more on each two acres; industrial and commercial development, alone or in combination with residential development; and the actively occupied portions of military reservations—as delineated by land and water use specialists of the Department of Water Resources.

SECTION B.

POPULATION

The tables in this Section summarize available data on the population of the State of California, its counties and cities. Comparisons of California's population with the totals for the Pacific Division and the Nation are also shown.

All figures on the total population of California through 1949 and those for April 1, 1950 and April 1, 1960 are from publications of the United States Bureau of the Census, and represent decennial census counts or estimates prepared by that agency. All estimates of the civilian population and estimates of the total population for the years 1950 to 1966 were prepared by the Department of Finance and are based on the analysis of components of population change summarized in Table B-3. Data used in the preparation of these estimates have been obtained from the Bureau of Vital Statistics, Department of Public Health; the Bureau of Education Research, Department of Education; the State Selective Service System, the United States Department of Defense; and the United States Department of Commerce, Bureau of the Census.

TABLE B-2

Department of Finance
Budget Division
Financial and Population Research Section

The Department of Finance publishes annual reports on the State's population, presenting additional material which includes current estimates of the State and County populations. A series of periodic reports is published listing current estimates prepared by the department at the request of various California cities.

TABLE B-1

POPULATION[a] AND PERCENT INCREASE IN POPULATION BY DECADE, CALIFORNIA, PACIFIC DIVISION, AND THE UNITED STATES, 1860-1960

Census of	Population			Percent change		
	California	Pacific division[b]	United States	California	Pacific division[b]	United States
1860	379,994	444,053	31,443,321	----	----	----
1870	560,247	675,125	38,558,371	47.4	52.0	22.6
1880	864,694	1,114,578	60,155,783	54.3	65.1	30.1
1890	1,213,398	1,888,334	62,947,714	40.3	69.4	25.5
1900	1,485,053	2,416,692	75,994,575	22.4	28.0	20.7
1910	2,377,549	4,192,304	91,972,266	60.1	73.5	21.0
1920	3,426,861	5,566,871	105,710,620	44.1	32.8	14.9
1930	5,677,251	8,194,433	122,775,046	65.7	47.2	16.1
1940	6,907,387	9,733,262	131,669,275	21.7	18.8	7.2
1950	10,586,223	15,114,964[c]	151,325,798[c]	53.3	55.3[c]	14.9[c]
1960	15,717,204	21,198,044[c]	179,323,175[c]	48.5	40.2[c]	18.5[c]

[a] Includes Armed Forces stationed in the State or states.
[b] Includes the states of California, Oregon, and Washington.
[c] Includes Alaska and Hawaii.

TABLE B-3

ESTIMATED COMPONENTS OF CHANGE IN CALIFORNIA'S CIVILIAN POPULATION, 1950-66

Year (July 1)	Civilian population	Net change	Net migration	Natural increase	Loss to military[a]
1950	10,472,000	311,000	155,000	146,000	+10,000
1951	10,754,000	282,000	268,000	149,000	—135,000
1952	11,194,000	440,000	284,000	163,000	—7,000
1953	11,681,000	487,000	307,000	181,000	—1,000
1954	12,177,000	496,000	289,000	195,000	+12,000
1955	12,668,000	491,000	273,000	193,000	+25,000
1956	13,247,000	679,000	364,000	208,000	+7,000
1957	13,848,000	601,000	388,000	221,000	—8,000
1958	14,410,000	662,000	325,000	226,000	+11,000
1959	14,964,000	554,000	329,000	224,000	+1,000
1960	15,567,000	603,000	368,000	231,000	+4,000
1961	16,163,000	596,000	346,000	244,000	+6,000
1962	16,737,000	574,000	353,000	241,000	−20,000
1963	17,349,000	612,000	369,000	234,000	+9,000
1964	17,902,000	553,000	352,000	230,000	−29,000
1965	18,417,000	515,000	310,000	217,000	−12,000
1966	18,848,000	431,000	270,000	205,000	−44,000

[a] Negative figure indicates net loss of civilians to the Armed Forces through induction and enlistment; positive figure indicates net gain of civilians from the Armed Forces through release.

SECTION C.

LABOR FORCE AND EMPLOYMENT

This section presents statistics relating to the civilian labor force of California, including employment, unemployment, hours of work, earnings, apprenticeship, work injuries, union membership, and work stoppages. Employment covered under the Unemployment Insurance provisions of the California Unemployment Insurance Code is regularly reported in *California Employment and Payrolls,* published quarterly by the Department of Employment. Agricultural employment covered *only* for purposes of Disability Insurance is regularly reported in *California Employment and Payrolls in Agricultural Labor,* also published quarterly by the Department of Employment. Current data on the civilian labor force, civilian employment and unemployment are published monthly in *Employment and Unemployment in California,* issued jointly by the Department of Industrial Relations and the Department of Employment. The Department of Industrial Relations, Division of Labor Statistics and Research, publishes monthly data on nonagricultural employment, average hours worked and average earnings in the *California Labor Statistics Bulletin;* monthly work injury statistics in *Work Injuries in California* and a detailed annual summary in *California Work Injuries;* annual union membership data in *Union Labor in California;* annual data on work stoppages in *Work Stoppages in California;* and information about collective bargaining practices and other industrial relations data in *California Industrial Relations Reports,* issued three or four times a year.

Labor force. The labor force represents the sum of civilian employment and unemployment as defined in the following paragraphs. Caution is urged in comparing the statistics of employment and unemployment contained in this section with those published by the United States Department of Labor. The figures are not strictly comparable because of differences in methods of collection as well as in definitions and concepts.

Total civilian employment. Representing an overall figure of total employment, civilian employment covers the estimated number of employees in nonagricultural establishments, as defined below, plus estimates of employers, own-account workers, unpaid family workers, domestic workers, and agricultural workers.

Nonagricultural employment. The statistics of nonagricultural employment are prepared by the Division of Labor Statistics and Research in cooperation with the United States Bureau of Labor Statistics, and are comparable with national estimates prepared by the United States Bureau of Labor Statistics and with State and area estimates prepared by other states. Excluded are domestic workers, employers, own-account workers, and unpaid family workers as well as agricultural workers. Government employment refers to civilian employees only.

The estimates cover all full- and part-time wage and salary workers (administrative, supervisory, sales, technical, and office personnel, and production workers) who worked during, or received pay for, any part of the pay period which includes the 12th of the month. Persons on an establishment payroll who are on paid holidays, paid sick leave, or paid vacations, or who work during a part of a specified pay period and are unemployed or on strike during the other part of the period are considered employed. Persons on the payroll of more than one establishment during the pay period are counted each time reported. On the other hand, persons who are laid off or are on leave without pay, who are on strike for the entire pay period, or who are hired but do not report to work during the pay period are not considered employed. Data for federal defense establishments generally refer to persons who worked on, or received pay for, the last day of the month; for federal nondefense establishments and state and local government, data relate to persons who received pay for any part of the pay period which includes the 12th of the month.

Agricultural employment. Estimates of employment in agriculture—including farmers, wage and salary workers, unpaid family workers, and foreign contract workers—are prepared by the California Department of Employment.

Other employment. Estimates of the number of employers, own-account workers, and unpaid family workers in nonagricultural industries and of domestic workers are prepared by the Department of Industrial Relations, Division of Labor Statistics and Research, based upon data derived from the U. S. Census of Population and upon various current series such as the number of sales tax permits, number of business and professional licenses, and other available information.

Unemployment. Estimates of unemployment are prepared by the California Department of Employment.

The term unemployment, as used in this series, means all persons who are in the labor market but who for the seven days in a given week have not done any work for pay or profit. To be counted as unemployed a person must be able to work, available for work, and looking for work.

The definition used is broadly comparable with that of the United States Bureau of the Census.

The estimates of unemployment represent the number unemployed during the week which includes the 12th of the month.

Components used in preparing estimates of total unemployment are (a) certified unemployment measured by weeks of unemployment insurance claimed under the California Unemployment Insurance Code minus partial and part-total weeks claimed, (b) estimated number of persons who have exhausted these benefits and remain unemployed, (c) estimated number of unemployed persons who could file for unemployment insurance compensation but do not file or delay filing a claim, (d) unemployed railroad workers as reported by the Railroad Retirement Board, (e) certified unemployment of federal workers covered under the provisions of the Unemployment Compensation for Federal Employees Act of 1954, (f) estimated unemployment among persons normally employed in industries not covered by unemployment insurance, such as agriculture, State and local government, domestic service, and most nonprofit institutions, and (g) estimated unemployment among recent entrants and re-entrants to the labor force and among the self-employed.

Unemployment rate. The unemployment rate represents the number of unemployed as a percent of the civilian labor force, i.e., the sum of the employed and the unemployed. The *seasonally adjusted unemployment rate* eliminates the influence of regularly recurring seasonal fluctuations which can be ascribed to weather, crop-growing cycles, holidays, vacations, regular industry model changeover periods, and the like, and, therefore, more clearly shows the underlying basic trend of unemployment.

Labor turnover. The Department of Employment develops and publishes labor turnover rates for manufacturing industries for the State as a whole and for the State's major metropolitan areas.

Labor turnover data, which represent the gross movement of wage and salary workers into and out of employment status with respect to individual establishments, are collected from a sample of 3,700 California establishments engaged in manufacturing. The sample covers approximately 65 percent of all manufacturing employment.

Labor turnover information is divided into two broad types: accessions (new hires and rehires), and separations (terminations of employment initiated by either employer or employees). Each type of action is cumulated for a calendar month and expressed as a rate per 100 employees.

Earnings and hours. The Division of Labor Statistics and Research compiles statistics of earnings and hours in all manufacturing and selected nonmanufacturing industry groups in California as a whole and in the thirteen major metropolitan areas of the State. These statistics of average weekly earnings, hourly earnings, and hours per week are derived from employment, payroll, and hours information reported by a representative sample of establishments in each industry group.

The averages are based upon data for full- and part-time workers who worked during or received pay for any part of the reported pay period in a given month (usually the week which includes the 12th of the month). Included in average earnings are overtime pay and premium wages for late shift work.

Work injuries. The work injury statistics are based upon reports of on-the-job injuries to workers employed in industries covered by the California Workmen's Compensation Act. These reports are filed with the Division of Labor Statistics and Research in compliance with the provision of the California Labor Code. Not covered by the California Workmen's Compensation Act are maritime workers, federal employees, and railroad workers in interstate commerce.

The injury rate per 1,000 workers employed in each industry division is obtained by dividing the number of disabling injuries reported by the estimated number of wage and salary workers in the industry.

The number of fatal work injuries includes (1) deaths for which findings and award decisions were issued by the Industrial Accident Commission; (2) deaths for which liability was accepted by the insurance carrier or self-insurer without Industrial Accident Commission determinations; and (3) deaths for which compromise and release agreements were approved by the Commission in which the sole issue was dependency. Deaths for which compromise and release settlements were approved (except those in which dependency was the sole issue of the compromise) are excluded from the work fatality statistics.

The statistics of insured payroll and workmen's compensation benefits are compiled by the California Inspection Rating Bureau, and are on a policy-year basis. The figures do not include the experience of self-insured private and government employers.

The statistics of payrolls and compensation benefits paid by private self-insurers are derived from semiannual reports submitted to the Supervisor of Self-Insured Employers, Department of Industrial Relations. The compensation benefits include amounts paid in the designated calendar year for injuries sustained in the current year and continuing benefits for injuries which occurred in previous years. These figures are not strictly comparable with the statistics of incurred losses contained in Table C-24.

Union membership. California union membership figures are collected by the Division of Labor Statistics and Research by means of the annual Organized Labor Questionnaire.

All unions affiliated with the AFL-CIO or predecessor organizations are included in the membership survey. Unions not affiliated with the AFL-CIO are included if they are known to have written collective bargaining agreements with two or more different employers. Also included are unaffiliated unions with a written collective bargaining agreement with a single employer if the contract covers the employer's operations in more than one location in California and if the union has 1,000 or more members. Unions of government workers, which do not usually execute written collective bargaining agreements, are included if affiliated with the AFL-CIO. An unaffiliated union of government employees is included only if it has members in other states as well as in California.

Work stoppages. The statistics of work stoppages in California are collected by the Division of Labor

Statistics and Research in cooperation with the United States Bureau of Labor Statistics.

Included are all known strikes and lockouts involving as few as six workers and lasting the equivalent of a full shift or longer. For statistical purposes a strike is defined as a temporary stoppage of work by a group of employees to express a grievance or to enforce a demand; a lockout is a temporary withholding of work from a group of employees by an employer (or group of employers) in order to induce them to accept the employer's terms. Each concerted action is counted as one stoppage, irrespective of the number of unions, employers, or establishments.

The number of *workers involved* includes all employees in establishments directly involved in a stoppage who are idle for a full shift or longer. Employees in other establishments who are unable to work because of material or service shortages, or for other reasons indirectly connected with the stoppage, are not counted among workers involved. The same worker can be counted more than once in the annual total if he is involved in more than one stoppage during the year.

The number of *mandays idle* is obtained by multiplying the number of workers involved in a stoppage by the number of days or shifts they would normally have worked had there been no stoppage. Allowances are made for fluctuations in the number of workers involved during the period of the stoppage.

[a] Includes wage and salary workers, employers, own-account workers, and unpaid family workers.
[b] Detail may not add to total because of rounding.
[c] Includes construction contractors and operative builders and their employees; does not include force-account and government construction workers.
[d] Excludes operative builders and their employees.
[e] Includes all civilian employees of Federal, State, and local governments regardless of the activity in which the employee is engaged.

[a] Employers not engaged in an exempt activity, who have one or more persons in their employ, and pay wages in excess of $100 during a calendar quarter are subject to the Code. Exempt employment is comprised of agricultural labor; interstate railroad employment; self-employed; Federal, State, and local government employment; domestic services in private homes; persons in the employ of certain nonprofit charitable, education, or religious organizations; persons in the employ of a son, daughter, or spouse; children under 21 employed by a parent; and certain other small groups of workers. Workers in exempt employment may be insured under provisions of the Code if the employer becomes subject employer through elective coverage.

[b] Includes "Operative builders."

[c] Excludes "Operative builders."

[d] Omitted to avoid disclosure of confidential information.

NOTE: Industry division and county detail may not add to tota due to rounding.

[a] Does not include employers, own-account workers, unpaid family workers, domestic servants, and agricultural workers.
[b] Detail may not add to total because of rounding.
[c] Includes employees of construction contractors and operative builders; does not include force-account and government construction workers.
[d] Excludes employees of operative builders.
[e] Includes all civilian employees of Federal, State, and local governments regardless of the activity in which the employee is engaged.
[f] Includes employees in mineral extraction, construction, and finance-insurance-real estate, 1960–63. Beginning in 1964, estimates are presented separately for each of these industries.

TABLE C-9

EMPLOYEES OF CALIFORNIA STATE GOVERNMENT,[a] 1950–65

Year	Total	Civil Service	Exempt[b]	State Colleges[c]	University of California[d]
1950	n.a.	47,719	1,034	2,783	n.a.
1951	n.a.	49,450	1,245	2,832	n.a.
1952	n.a.	53,056	1,241	3,132	n.a.
1953	n.a.	56,545	1,277	3,606	n.a.
1954	n.a.	60,163	1,278	3,931	n.a.
1955	84,508	64,015	1,327	4,777	14,389
1956	92,382	70,219	1,375	5,857	15,831
1957	101,345	76,090	1,402	6,858	16,995
1958	108,340	80,932	1,459	7,814	18,135
1959	114,719	84,245	1,534	9,155	19,785
1960	118,471	85,900	1,680	9,818	21,073
1961	128,143	93,044	1,637	9,678	23,784
1962	134,361	96,277	1,539	10,861	25,684
1963	140,152	99,960	1,461	11,670	27,061
1964	147,349	103,377	1,499	13,107	29,366
1965	157,249	108,863	1,390	14,619	32,377

[a] Figures do not include employees of the Berkeley and Livermore Radiation Laboratories, the Los Alamos Scientific Laboratory, Hastings College of Law, and Gen-12 Medical-Biological Project of Los Angeles.
[b] Because of changes in classification, the 1965 figure is not comparable to the rest of the series.
[c] Beginning with 1961, the figures reflect the number of full-time-equivalent positions reported in the Governor's budget for the fiscal year.
[d] Full-time-equivalent positions. These data are based on March payroll statistics.

TABLE C-15

AVERAGE HOURS AND EARNINGS OF PRODUCTION WORKERS IN MANUFACTURING, BY INDUSTRY, METROPOLITAN AREAS, 1965 [a]

Metropolitan area and industry	Average weekly hours	Average weekly earnings	Average hourly earnings
Los Angeles-Long Beach			
Total manufacturing	40.8	$121.99	$2.99
Total nondurable goods	38.8	109.42	2.82
Food and kindred products	38.7	122.29	3.16
Fish canning and preserving	33.1	80.76	2.44
Meat products	41.5	135.29	3.26
Dairy products	38.6	135.49	3.51
Fruit and vegetable canning and preserving	38.3	102.26	2.67
Grain mill products	44.6	124.88	2.80
Bakery products	37.2	128.71	3.46
Beverage industries	39.5	150.89	3.82
Textile mill products	41.4	92.32	2.23
Apparel and other fabricated textile products	37.2	74.40	2.00
Men's and boys' furnishings, work and sport garments	38.5	71.23	1.85
Women's and misses' outerwear	35.9	76.11	2.12
Women's and children's undergarments	38.1	64.39	1.69
Paper and allied products	41.4	120.06	2.90
Converted paper and paperhoard products, except containers and boxes	40.7	111.93	2.75
Paperhoard containers and hoxes	41.7	122.18	2.93
Printing, puhlishing, and allied industries	35.5	136.32	3.84
Newspapers	33.2	140.44	4.23
Chemicals and allied products	41.6	123.55	2.97
Industrial chemicals	42.3	136.21	3.22
Plastics materials and other synthetic materials except glass	42.2	125.76	2.98
Drugs	39.6	100.19	2.53
Paints, varnishes and allied products	40.5	121.91	3.01
Petroleum refining and related industries	41.8	137.10	3.28
Petroleum refining	41.6	137.70	3.31
Rubber and miscellaneous plastics products	42.2	125.33	2.97
Miscellaneous fabricated rubher products	41.2	101.35	2.46
Miscellaneous plastics products	41.8	94.89	2.27
Leather and leather products	37.2	74.40	2.00
Total durable goods	41.7	127.60	3.06
Lumher and wood products, except furniture	40.1	120.70	3.01
Millwork, veneer, plywood, and prefabricated structural wood products	39.7	130.61	3.29
Furniture and fixtures	39.4	109.14	2.77
Household furniture	39.1	107.92	2.76
Stone, clay, and glass products	40.5	115.83	2.86
Structural clay products	40.9	106.34	2.60
Pottery and related products	38.9	86.36	2.22
Concrete, gypsum, and plaster products	39.7	142.52	3.59
Primary metal industries	42.5	128.78	3.03
Iron and steel foundries	40.7	113.55	2.79
Rolling, drawing and extruding—nonferrous metals	43.8	129.21	2.95
Nonferrous foundries	41.8	108.68	2.60
Fabricated metal products, except ordnance, machinery, and transportation equipment	42.2	123.65	2.93
Cutlery, hand tools, and general hardware	40.8	105.26	2.58
Heating apparatus (except electrical) and plumbing fixtures	41.0	109.47	2.67
Fahricated structural metal products	40.1	130.33	3.25
Screw machine products, and holts, nuts, ecrews, rivets and wasbers	44.8	129.92	2.90
Metal stampings	43.9	127.75	2.91
Coating, engraving, and allied services	40.6	99.47	2.45
Miscellaneous fahricated wire products	40.5	108.95	2.69
Los Angeles-Long Beach—Continued			
Machinery, except electrical	43.0	$129.00	$3.00

Excluding overtime	2.96	2.85	3.01	2.88	2.74	2.95	3.21	3.19	3.23

Averages are based upon data for full-time and part-time production and related workers in production and other departments, such as shipping, maintenance, and warehousing. Average weekly hours include overtime hours. Overtime hours are hours in excess of regular hours and for which overtime premiums are paid. Average gross hourly earnings include overtime pay and premium wages for late-shift work. Hourly earnings, excluding overtime, are derived on the assumption that overtime hours are paid at the rate of time and one-half.

1965	132.00	115.56	105.81	102.54	93.89

[a] Based upon data for full-time and part-time production and related workers. Overtime pay and premium wages for late-shift work are included.

[b] After Federal and State income taxes and old-age and disability insurance deductions.

[c] Net spendable earnings adjusted for changes in the Consumer Price Index. The Consumer Price Index is compiled by the U. S. Bureau of Labor Statistics for the Los Angeles-Long Beach and the San Francisco-Oakland metropolitan areas. The Index for California is a weighted average of these two areas.

TABLE C-20

DISABLING WORK INJURIES,[a] CALIFORNIA, 1950–65

Year	Total	Fatal[b]	Nonfatal
1950	136,814	691	136,123
1951	145,075	682	144,393
1952	146,223	962	145,261
1953	142,715	829	141,886
1954	132,534	706	131,828
1955	146,092	767	145,325
1956	154,172	827	153,345
1957	148,631	786	147,845
1958	144,366	852	143,514
1959	164,243	740	163,503
1960	158,663	811	157,852
1961	162,055	832	161,223
1962	166,008	1,023	164,985
1963	173,475	650	172,825
1964	182,173	726	181,447
1965	182,046	710	181,336

[a] Disability causing absence from work for a full day or shift beyond the day of the injury. Excludes injuries to employees not covered by the California Workmen's Compensation Act, such as maritime workers, Federal employees, and railroad workers in interstate commerce.

[b] The number of work fatalities for years since 1963 are not comparable with the totals for earlier years due to a change in the definition of a "work fatality."

[a] Excludes experience of self-insured employers. (There were approximately 312 self-insured employers in 1963.)
[b] "Policy year basis": Losses originating under policies effective in a given year are assigned to that year regardless of accident date.
[c] Losses incurred are estimated ultimate loss costs and include not only the amount paid as of the valuation date, but also include estimated amounts to be paid in the future. Detail may not add to total because of rounding.

TABLE C-25

AMOUNT OF PAYROLL, COMPENSATION INDEMNITY BENEFITS, AND MEDICAL COSTS PAID BY SELF-INSURERS,[a] CALIFORNIA, 1950–64

(In thousands)

Year	Total payroll	Benefits paid[b]		
		Total	Indemnity benefits	Medical costs
1950	$1,579,970	$4,971	$2,701	$2,270
1951	1,932,512	5,522	2,841	2,681
1952	2,270,466	6,069	3,049	3,020
1953	2,464,626	6,940	3,559	3,381
1954	2,492,623	6,957	3,618	3,339
1955	2,855,339	7,688	3,782	3,906
1956	3,464,339	8,267	3,823	4.444
1957	3,007,550	8,775	4,158	4,617
1958	3,310,426	10,097	5,122	4,975
1959	3,470,289	10,643	5,370	5,273
1960	3,700,389	12,032	6,267	5,765
1961	3,880,493	13,758	7,748	6,010
1962	4,029,415	16,254	9,413	6,841
1963	4,388,566	18,544	10,911	7,633
1964	5,075,456	20,641	12,246	8,395

[a] A few self-insurers carry workmen's compensation insurance policies covering all or a portion of the risk. Self-insurers' losses covered by policies of insurance are included in the table showing benefits paid by workmen's compensation insurance carriers.
[b] Does not include estimated future costs of medical or indemnity benefits.

TABLE C-29

WORK STOPPAGES, WORKERS INVOLVED, AND MANDAYS IDLE, CALIFORNIA, 1950–65

Year	Work stoppages beginning in year		Mandays idle during year	
	Number	Workers involved	Number[a]	Percent of estimated available working time[b]
1950	238	138,000	1,630,000	0.24
1951	217	98,500	1,210,000	0.16
1952	217	234,000	4,410,000	0.56
1953	269	210,000	2,960,000	0.36
1954	206	88,100	1,070,000	0.13
1955	247	157,000	1,760,000	0.20
1956	217	92,700	1,220,000	0.13
1957	235	104,000	1,570,000	0.16
1958	221	73,100	1,130,000	0.12
1959	260	102,000	3,340,000	0.34
1960	292	104,000	855,000	0.08
1961	269	99,100	1,110,000	0.09
1962	263	143,000	2,660,000	0.25
1963	276	60,200	1,340,000	0.12
1964	266	92,400	1,910,000	0.16
1965	341	150,000	2,340,000	0.20

[a] Includes idleness for all stoppages active in the year including those that began in the previous year.

[b] "Estimated available working time" is calculated by multiplying average nonfarm employment in private industry during the year in California by an estimate, used for the same purpose by the Bureau of Labor Statistics, U. S. Department of Labor, of mandays worked annually by most workers.

Department of Industrial Relations
Division of Labor Statistics and Research

TABLE C-30

WORK STOPPAGES, BY INDUSTRY, CALIFORNIA, 1965

Industry	Stoppages beginning in 1965			Mandays idle during 1965[a]	
	Number	Workers involved		Number	Percent of total
		Number	Percent of total		
Total	[b]341	150,000	100	2,340,000	100
Manufacturing	174	47,600	31	872,000	37
Food and kindred products	16	1,110	1	12,000	1

Rubber and miscellaneous plastics products	15	4,110	3	29,200	1
Leather and leather products	1	320	[c]	14,500	1
Stone, clay, and glass products	15	2,380	2	49,500	2
Primary metal industries	11	3,450	2	195,090	8
Fabricated metal products except ordnance, machinery, and transportation equipment	25	12,200	8	150,000	6
Machinery, except electrical	11	2,990	2	41,900	2
Electrical machinery, equipment, and supplies	11	1,250	1	10,900	1
Motor vehicles and equipment	8	2,590	2	30,000	1
Aircraft and ordnance	4	5,680	4	152,000	7
Ship and boat building and repairing	1	1,980	1	62,700	3
Instruments and related products	5	300	[c]	3,840	[c]
Other manufacturing industries	4	310	[c]	10,700	[c]
Nonmanufacturing	184	103,000	69	1,470,000	63
Agriculture, fishing, and mineral extraction	18	5,660	4	71,700	3
Construction	89	74,200	50	1,200,000	51
Transportation, communication, and other public utilities	22	14,300	10	71,500	3
Wholesale trade	21	2,940	2	29,500	1
Retail trade	20	4,490	3	78,600	4
Services	10	570	[c]	18,300	1
Finance, insurance, and real estate	2	70	[c]	700	[c]
Government	2	300	[c]	680	[c]

[a] Includes idleness in 1965 for stoppages that began prior to 1965.

[b] This total is less than the sum of the totals of both groups because four stoppages affecting more than one industry are counted as separate stoppages in each industry affected.

[c] Less than ½ of 1 percent.

NOTE: Detail may not add to total because of rounding.

SECTION D.

INCOME AND COST-OF-LIVING

This section presents data on business and personal income and the consumer price index.

Business Income

Tables D-1 to D-3 are compiled from corporate income data reported on returns filed with the Franchise Tax Board.

Corporations doing business in California and those having income from California sources but not technically doing business here are subject to the Bank and Corporation Tax Law. Chapter 2 of the law imposes the bank and corporation franchise tax and Chapter 3 the corporation income tax.

The bank and corporation franchise tax is imposed for the privilege of doing business in California and is according to or measured by the amount of net income earned in or allocable to the State in the preceding fiscal or calendar year. A corporation conducting a unitary business both within and without the State applies an allocation factor to its income in order to determine the amount subject to state taxation. The standard allocation formula is the arithmetic average of three factors—the ratio of California sales to total sales, the ratio of California payrolls to total payrolls, and the ratio of California property to total property. For the period 1935-1958, the basic bank and corporation franchise tax rate was 4 percent and the minimum franchise tax $25 a year. For 1959 and subsequent years, the rate was set at 5½ percent and the minimum tax, with limited exceptions, was increased to $100. Banks are exempt from paying the minimum tax.

The corporation income tax applies to corporations that derive income from California sources but do not engage in intrastate business in California. The corporation income tax rate is also 5½ percent (4 percent for 1958 and earlier income years) but there is no minimum tax. Data for these corporations have been omitted from Tables D-1 to D-3. For 1964, they numbered only 1,855, reported $23,185,852 net income taxable in California, and paid $1,517,468 in corporation income taxes.

Returns for fiscal years ending within a calendar year are included with returns for that calendar year.

Personal Income

Estimates of personal income received by residents of each state are prepared annually by the National Income Division, Office of Business Economics, in the United States Department of Commerce. Data are available, by years and types of income, back to 1929 in *Personal Income By States.* Totals and details for the most recent years are reported in the August issue of the *Survey of Current Business.* Quarterly estimates of personal income in California, at annual rates, comparable to the United States Department of Commerce series, are prepared by the Budget Division of the State Department of Finance. Mimeographed reports of this information are available upon request.

An understanding of the conceptual basis of income estimates is essential to the use of these data and it is assumed that users interested in sources of basic information, estimating techniques, definitions, and limitations of these data will consult the Department of Commerce reports mentioned above. Particular note should be taken of the facts that income (1) represents receipts before payment of income taxes and certain non-tax charges, and (2) includes nonmonetary income, such as imputed net rental values of owner-occupied homes and payments in kind rather than cash. As defined, residents include individuals, nonprofit institutions, private trusts, and private pension, health and welfare funds. Nonprofit institutions include religious organizations, clubs, labor organizations, nonprofit schools and hospitals, charitable, welfare, and other private nonprofit agencies furnishing services to individuals.

Briefly stated, the following are comprised in the six categories of income shown here:

Wage and salary disbursements. Monetary remuneration of employees, including commissions, tips, bonuses, etc., and payments in kind.

Other labor income. Employer contributions under private pension, health, welfare and group insurance plans, compensation for injuries, pay of military reservists, directors' fees, etc.

Proprietors' income. Net business earnings of owners of unincorporated enterprises, including farmers and such professional practitioners as doctors, dentists, and lawyers.

Property income. Rental income of persons (including royalties on patents, copyrights, and rights to natural resources and imputed net rents), personal interest incomes (including certain imputations), and cash dividends.

Transfer payments. Receipts from government and business for which no service is rendered currently: pensions, unemployment benefits, disability benefits, medicare benefits, direct relief, bad debts absorbed by business establishments, corporate gifts to private nonprofit institutions, etc.

Personal contributions for social insurance. Employee contributions for old age and survivors insurance, unemployment insurance, medicare and public employee retirement systems. Includes similar contributions for such purposes by self-employed individuals. Personal contributions for social insurance are deducted in estimating personal income, since wage and salary disbursements are reported including amounts withheld by employers for this purpose.

The source report shows total and per capita incomes by types and major sources in greater detail than is shown in this *Abstract,* industrial sources of personal income, total and per capita disposable income (after direct personal taxes and certain nontax payments) and ratios which cannot be reproduced here for reasons of space.

Estimates of personal income by counties, formerly prepared by the California State Chamber of Commerce, were discontinued after 1961.

Personal income tax data. Personal income tax returns are required of single persons with gross incomes of $5,000 or more or adjusted gross incomes of $2,000 or more and of married persons with gross incomes of $5,000 or more or adjusted gross incomes of $4,000 or more. For the period 1950–1958, the net income filing requirement was $2,000 for single persons and $3,500 for married persons.

Personal income tax tables are classified by adjusted gross income class intervals. Adjusted gross income includes salaries and wages (less certain unreimbursed expenses incurred in connection with employment), dividends, interest, annuities, a percentage of net gains or net losses from the sale or exchange of capital assets, gains or losses from the sale or exchange of property other than capital assets, rents and royalties less expenses attributable thereto, gross receipts from business less costs of goods sold and business expenses, and distributive shares of partnership gross income, alimony and separate maintenance payments, pensions, income from life insurance and endowment contracts, income from discharge of indebtedness, income in respect to a decedent, and income from interest in an estate or trust.

Sampling techniques have been used to derive most of the data appearing in the tables presenting the number of personal income tax returns and the amount of adjusted gross income.

It is evident, of course, that much of the personal income is received by persons who had insufficient amounts of gross income and net income to necessitate their filing state returns or is exempt from state taxation (e.g., dividends on veterans' government insurance, federal and state social security benefits, railroad retirement benefits, workmen's compensation for personal injuries or sickness, interest on federal bonds, etc.). Conversely, there are items of taxable income which are not included in the personal income concept such as gains from sales of assets and alimony. Hence, the data on taxable income are not strictly comparable to those on personal income.

Prices

Tables D-10 and D-11 present the Consumer Price Index for the Los Angeles-Long Beach Metropolitan Area (Los Angeles and Orange counties), the San Francisco-Oakland Metropolitan Area (Alameda, Contra Costa, Marin, San Francisco, San Mateo and Solano counties), California, and the United States.

The index measures the average change in prices of goods and services usually bought by urban wage earners and clerical workers, both families and single persons living alone.

The indices for Los Angeles-Long Beach, San Francisco-Oakland and the United States are those compiled by the United States Bureau of Labor Statistics. The index for California has been computed by the California Department of Industrial Relations, Division of Labor Statistics and Research, as the weighted average of the Los Angeles and San Francisco indices. The weights used are proportional to the populations of the Los Angeles and San Francisco areas.

Current figures for Pacific Coast areas are published regularly by the Regional Office, United States Bureau of Labor Statistics, San Francisco.

Comparisons of indices for individual areas show only that prices in one location changed more or less than in another. These indices cannot be used to measure differences in price levels or in living costs between areas.

TABLE D-1

CORPORATE TAX RETURNS, STATE NET INCOME, AND TAX ASSESSED, CALIFORNIA, 1950–64 [a]

Year	Number of returns	Net income reported for state taxation	Tax assessed [b]
1950	21,987	$2,431,894,545	$105,117,408
1951	24,538	2,765,742,341	117,982,468
1952	25,646	2,522,431,970	110,770,522
1953	27,561	2,757,676,330	122,527,802
1954	29,489	2,892,461,734	131,872,070
1955	35,020	3,429,694,824	151,508,790
1956	40,713	3,656,954,599	163,031,085
1957	44,527	3,663,837,036	164,252,185
1958	46,414	3,629,549,148	166,109,271
1959	53,456	4,155,386,859	239,556,222
1960	56,987	4,181,754,205	255,234,712
1961	59,746	4,508,953,067	275,392,583
1962	63,400	4,754,427,317	287,066,421
1963 [c]	66,496	5,091,922,000	304,613,490
1964	69,554	5,477,233,726	324,200,479

[a] Includes bank and corporation franchise tax returns received through approximately the end of November of the succeeding year. Excludes corporation income tax returns.

[b] Includes the second-installment taxes on national and state banks, building and loan and savings and loan associations, and other financial corporations assessed under the provisions of Section 23186a of the Bank and Corporation Tax Law.

[c] Revised.

Franchise Tax Board
Research and Statistics Section

SECTION E.

HEALTH AND WELFARE

Compiled under this broad heading are tables relating to vital statistics; public health; mental hygiene; crime, criminal justice and delinquency; and social insurance.

Vital Statistics and Public Health

This section presents statistics relating to public health in California, prepared by the State Department of Public Health.

The sources of data for public health statistics and reports are registration and reporting systems established by law, voluntary reporting systems established with local health agencies, and surveys and special studies conducted or sponsored by the Department.

Tables E-1–E-5—Crude rates for vital events are influenced by age and sex distributions within the population. In interpreting these statistics, certain limitations must be recognized. The comparability of cause of death data is affected by increasing medical knowledge, changes in classifying disease categories, and changes in international rules for selecting the underlying cause of death.

For interpretation of statistics relating to vital events, the following definitions should be noted:

Residence. A person's residence is his usual place of abode. Birth tables by residence refer to the place where the child's mother usually lives. Differing from the census allocation, deaths and births in institutions are allocated to the inmate's previous residence regardless of length of stay in institution.

Occurrence. The place of occurrence is where the event actually occurred. California residents taking part in marriages, divorces and annulments in other states are not enumerated in Table E-3.

Live Birth. Live birth is the complete expulsion or extraction from its mother of a product of conception (irrespective of the duration of pregnancy) which, after such separation, breathes or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles. A fetal death is required to be registered if the 20th week of gestation has been reached.

Table E-6—Morbidity data are limited by the incompleteness of reporting, the changes made in specific diseases which shall be reported, and by the nature of the incidence of certain diseases in cyclical patterns.

Tables E-7 and E-8—The Hospital Licensing Program. The Department of Public Health licenses hospitals, nursing homes and related health facilities to insure that standards of patient care are met. The Hospital Advisory Board conducts public hearings and makes recommendations on standards.

More detailed statistical information is published annually in the California Public Health Statistical Report and other series. Other public health data from program activities, special studies and research projects are available from the Division of Research, Health Surveillance Unit, Department of Public Health, 2151 Berkeley Way, Berkeley, California.

Mental Hygiene

This section presents statistics on the major programs maintained by the State of California for the care and treatment of persons with mental and emotional disorders. The State Department of Mental Hygiene maintains ten hospitals for the care and treatment of patients with mental illness and related psychiatric disorders, three day treatment centers, four hospitals for the custodial care and training of mentally retarded persons, seven State mental hygiene clinics for outpatient treatment, and two neuropsychiatric institutes (associated with the University of California Medical School) for treatment of patients, training of professional personnel, and research.

It should be understood that the prevalence of treated mental disorder cannot be measured by the statistics in the following tables, since these data are limited to facilities either operated by or subsidized through the Department. Treatment is also offered by licensed private mental institutions in the State, with an inpatient caseload of more than 6,000, by locally operated nonprofit outpatient psychiatric clinics, by city and county general hospitals with psychiatric wards, by three large neuropsychiatric hospitals of the United States Veterans Administration, by public school systems with special classes (particularly for children with mild or moderate mental retardation), and by the large number of psychiatrists in private practice.

More detailed information on the subjects covered by the following tables and other services in the field of mental hygiene is available in periodic and special reports issued by the Department of Mental Hygiene. Additional statistical data on mental hygiene facilities outside the Department are available in periodic reports issued by the Biometrics Branch of the National Institute of Mental Health.

Hospitals for mentally ill. The majority of patients are admitted to these hospitals through commitment by the county superior courts. The majority of commitments are for the treatment of mental illness, but some are made for chronic alcoholism, drug addiction, and sex offenses predisposed by mental disorder. A patient may be released at any time after admission when, in the medical judgment of the superintendent, he has improved sufficiently to permit a return to the community; for mentally disordered sex offenders, the approval of the committing court must also be obtained. Hospitalization ranges from a few days for the treatment of an acute transitory episode to 40 or 50 years for a patient with severe chronic mental

illness. The median length of stay prior to discharge is less than three months.

Many counties request observation placement for patients in a State hospital prior to the adjudication of mental illness. About half of these observation placements return to the community without commitment. In some of the counties, the county general hospital provides this service.

Two types of admission do not involve court action: hospitalization may be requested by the county health officer on the certification of two physicians, or voluntarily by the patient at his own request. This last form of hospitalization, which may be terminated by the patient at any time, accounts for an increasing proportion of the total annual admissions. Currently, about one in every four patients is admitted on a voluntary basis. Patients who are committed, of course, can petition the committing court for their release through habeas corpus proceedings.

Patients may be released from the hospital by leave of absence, with continued extramural supervision by psychiatric social workers of the Department. About 60 percent of the leave placements are successfully closed by discharge and about 40 percent are returned to the hospital for further treatment. Departures without staff permission are classified as unauthorized absences, usually involving patients who have almost completed their convalescence and have complete freedom of the hospital grounds; in most instances the patient either returns to the hospital, or the case is continued under extramural supervision or closed by discharge.

For many types of patients the case is closed by direct discharge at the time the patient is released from the hospital. Finally, cases are also closed by death in the hospital.

Hospitals for mentally retarded. A patient is considered eligible for admission only if the parent or guardian, the county authorities, and the hospital medical staff are in complete agreement that hospitalization is best for the patient and for his family. Following the determination of eligibility, admission may be delayed for periods ranging from a few days to several years, depending upon the relative urgency of the case. On June 30, 1965, there were 1,932 cases on the waiting list.

Unlike mental illness, mental retardation is relatively incurable. Thus patients with severe mental retardation usually receive lifetime custodial care. On the other hand, the mildly mentally retarded participate in training and rehabilitation programs and in hospital maintenance activities, and thus are able to return to useful lives in the community after only a few years.

Community Mental Health Services. Patients having neurological or emotional disorders who can benefit from psychiatric treatment while remaining in their communities are served by the seven state-operated mental hygiene clinics, by aftercare clinics located at ten of the state hospitals for mentally ill and at one hospital for the mentally retarded, and by the outpatient departments of the two neuropsychiatric institutes at San Francisco and Los Angeles. More recently, community psychiatric services have been made available at outpatient, inpatient, and psychiatric rehabilitation facilities administered by cities or counties where part of the costs of operation are met by state subvention under the Short-Doyle Act for Community Mental Health Services.

Psychiatric services rendered by these facilities include diagnostic evaluation, psychological testing, individual interview psychotherapy, group psychotherapy, and family-centered therapy, as well as treatment through the use of psycho-pharmaceuticals and electric shock. In addition, the majority of these clinics offer consultation and informational services to both professional and lay groups in the local community.

Inpatient care offered by cities and counties is limited to short-term evaluation or treatment. Reimbursement under the Short-Doyle Act may not cover hospitalization in excess of 90 days.

Crime, Criminal Justice and Delinquency

This section presents summary tables showing the number and procedural movement of persons under commitment to the two State correctional agencies, the Departments of Corrections and Youth Authority.

Data relating to the Department of Corrections were compiled starting with 1945, and those for the Youth Authority with 1946, the years in which central statistical controls were established. Figures for years not included here were published in the 1964 *California Statistical Abstract.*

No data are presented on crimes committed, persons arrested, or the procedures of criminal justice. These data, to be meaningful, must be given in more detail, and require more explanation and qualification than would be appropriate in this volume. The interested reader is referred to the publications of the Bureau of Criminal Statistics, Department of Justice, for such data. The first of these, *Crime in California,* presents data on felony crimes, felony arrests, and juvenile arrests, as reported by sheriffs and police, and on the procedures and results of prosecution in the superior courts, as reported by district attorneys. *Delinquency and Probation in California* presents data on the characteristics of, and procedures applied to (1) juveniles referred to county probation departments, (2) persons referred by superior and juvenile courts to the Youth Authority and, (3) convicted persons referred by superior courts to their respective probation officers. *California Prisoners,* published by California Department of Corrections, describes the characteristics and movement through prison and parole of adult persons convicted of felonies and committed to the Department of Corrections.

The Annual Statistical Report published by the California Youtb Authority summarizes the facts about the referrals to that Department, characteristics of wards first committed, ward population movement and data on parole performance.

In the Department of Corrections, the California Rehabilitation Center was established by 1961 legislative action. This Center, opened September 15, 1961, is for the confinement and treatment of narcotic addicts civilly committed to the Department under Penal Code Chapter 11 and Welfare and Institutions Code 3000 et seq.

Social Insurance and Welfare

This section presents data relating to State programs providing unemployment and disability insurance, Federal programs administered in California to provide unemployment compensation to veterans and former federal employees and Old-Age, Survivors, and Disability Insurance benefits; federal, state and county programs assisting the aged, the blind, the disabled, and needy children, providing medical care for public assistance recipients and medical assistance for the aged; county programs of general relief; and the state, county and private agency program providing adoption services. There are several principal sources for these data. Current statistics relative to operations are available in the monthly report to the Governor prepared by the Department of Employment and in monthly reports prepared by the Department of Social Welfare. Data on public assistance expenditures and recipients are regularly reported in *Public Welfare in California,* issued monthly by the Department of Social Welfare. Public assistance data are based on reports to the Department of Social Welfare by county welfare departments. Data on medical care recipients and expenditures are reported regularly in *Medical Care Services and Expenditures,* published monthly by the Department of Social Welfare. Public assistance and medical care data are based on reports to the Department of Social Welfare by county welfare departmeuts. Data on adoption services are based on reports to the Department of Social Welfare by the department's area offices, and by county welfare departments and private adoption agencies.

Employment Security. Unemployment insurance and disability insurance activities are reported here from 1950 on. Legislation has modified the coverage, benefits, and services under these programs from time to time, and many uses of the data will require reference to the statutory changes. A detailed description of all changes which substantially affect the figures given here has been published by the Department of Employment under the title, *Summary of Major Changes in Program of Department of Employment, 1935–1965.*

Old Age Security. Statistics under this caption relate to financial assistance to persons 65 years of age or over who do not have sufficient financial resources to support themselves. Within limitations, recipients may own real property if it provides some income and keep additional real or personal property as a reserve for future needs. In general, the ceiling on income producing real property is $5,000 assessed valuation and $1,200 net value on real and personal property held as a reserve. There is no limitation on the value of any real or personal property used as a home. The recipient must have lived in California for one year immediately preceding application plus four of the last nine years.

Aid to the Blind. The data relate to financial assistance for blind persons in need who cannot support themselves.

Recipients may own real property if it provides some income and keep additional real or personal property as a reserve for future needs. In general, income-producing property must be producing income reasonably related to its value and the ceiling on real and personal property held as a reserve is $1,500 net value. There is no limitation on the value of any real or personal property used as a home. A recipient with an approved plan for self-support may own additional property for not longer than 36 months if the property will further his self-support plan. The recipient must be at least 16 years of age and be a resident of California.

Aid to Potentially Self-supporting Blind. These figures describe finaucial assistance and medical care for persons who, because of blindness, are unable to support themselves, but are working on a plan for self-support.

Within limitatious, recipients may own real property and keep additional real or personal property for future needs and own additional property if the property will further his self-support plan. Age and residence requirements are the same as those for Aid to the Blind.

Aid to Families with Dependent Children. The data relate to financial assistance for children under 18 years of age who are in need because of the death, continuous absence, incapacity, or unemployment of a parent. (The program was amended, effective February 1, 1964, to include children in need because of unemployment of a parent.) In general, the ceilings in financial resources are $600 value of personal property, less certain encumbrances, and $5,000 assessed valuation of real property, less encumbrances of record. Unless the child was born in California, he or his parent(s) must have resided in California for at least one year before application. Assistance is available for children living in foster homes as well as for children living with a parent(s) or relatives.

Aid to Needy Disabled. Figures under this heading relate to financial assistance and medical care for needy persons who have a major physical or mental impairment or a combination of both that is likely to continue without substantial improvement throughout their lifetime and which substantially precludes them from engaging iu useful occupations within their competence, such as holding a job or homemaking. To be eligible, a person must be at least 18 years of age, and a) have lived in California at least three years of the nine preceding application (one of which must be the year preceding applicatiou) or b) have become disabled while a resident of the state. Property qualifications are the same as iu OAS.

Medical Assistance for the Aged. This program, which began January 1, 1962, provides payments for care in hospitals and nursing homes and outpatient after-care, to persons 65 years of age and over who are not recipients of Old Age Security and who are unable to pay for this care from their own funds. The statistics report the number of inpatient and outpatient certificate holders in benefit status, total and average payments by type of care, and source of funds. The MAA program was abolished when the California Medical Assistance Program became effective March 1, 1966. Persons receiving medical care under MAA were transferred to the new program.

Public Assistance Medical Care (PAMC). This program, whieh began October 1957, provides payments for medieal care, (ehiefly outpatient eare), for recipients of eategorical aid. The seope of benefits varies according to the eategory of aid. PAMC data are shown as part of the statistics for eaeh eategorieal aid program. The PAMC program was also terminated with the advent of the California Medieal Assistance Program on March 1, 1966. Under the new program, uniform comprehensive medieal eoverage is available to all aid recipients. In addition, inpatient care and outpatient after-care are available to those medically needy persons and families who meet categorical aid requirements, exeept for ineome.

General Relief. Data on this subject relate to assistanee to needy persons not eligible under state subvented assistance programs listed above. It is administered and finaneed entirely by counties. Eligibility requirements and standards of assistance vary from eounty to county.

Adoptions. Serviees provided by this program include studies of the suitability of adoptive homes, suitability of ehildren for adoption, and reeommendations to the eourts on granting of adoption petitions. When a child is plaeed in an adoptive home by an adoption ageney (eounty or private), it is termed a "relinquishment" adoption; when the child is plaeed direetly by the parent, it is termed an "independent" adoption.

TABLE E-6

CASES AND DEATHS, SELECTED NOTIFIABLE DISEASES CALIFORNIA, 1965

Disease	Cases	Deaths[a]
Amebiasis	298	13
Botulism	2	--
Brucellosis	15	1
Coccidioidomycosis	295	27
Diphtheria	5	1
Encephalitis, infectious	408	44
St. Louis	1	--
Western	9	--
Chickenpox	23	6
Measles	30	2
Mumps	176	2
Other etiology	21	2
Unknown etiology	148	32
Food poisoning (other than botulism)	1,559	--
Hepatitis, infectious	5,013	72
Hepatitis, serum	380	38
Leprosy	14	--
Leptospirosis	7	2
Malaria	42	--
Measles	13,889	13
Meningococcal infections	449	71 p
Meningitis, viral or asceptic	608	22
Mumps	17,827	1
Pertussis	849	4
Poliomyelitis, paralytic	5	1
Psittacosis	11	--
Q fever	21	--
Relapsing fever	4	--
Rheumatic fever	92	n.a.
Rocky Mountain Spotted Fever	2	--
Salmonella infections	1,781	12
Shigella infections	1,617	6
Streptococcal infections, respiratory	43,554	n.a.
Tetanus	21	14
Trachoma	13	--
Trichinosis	23	--
Tuberculosis	4,567	604
Tularemia	9	--
Typhoid fever	65	--
Venereal Diseases	53,299	231
Chancroid	48	n.a.
Gonorrhea	41,551	n.a.
Granuloma inguinale	5	n.a.
Lymphogranuloma venereum	16	n.a.
Syphilis, total	11,679	231
Primary and secondary	1,995	--

[a] Deaths shown above may not agree with deaths shown in vital statistics tables because some diseases are not listed separately in the International List of Causes of Death upon which the vital statistics tables are based or the definitions of some diseases used in the International List differ from the definitions used for morbidity purposes.

[a] Through 1945, limited to commitments and voluntary admissions of patients without previous hospitalization in any state or federal mental hospital. Patients admitted for 90-day observation without commitment were included in 1946, and patients admitted for brief court observation without commitment were included in 1954. In 1955-58, a first admission was defined to include patients with no previous care in any public or private mental hospital. Beginning in 1959, first admissions comprised those patients with no previous hospitalization in a California State hospital. All changes in legal classification are excluded. (See footnote on Table E-10.

[a] Includes all wards placed by Youth Authority in State and local institutions.

[b] Beginning in 1957, wards on furlough were considered part of the resident population; movements to and from furlough are therefore not shown as population movements. Starting again in 1962 the wards on furlough were not considered as part of the resident population.

[c] Parole guests in institutions are included in "Other" figures prior to 1965.

[d] Beginning in 1962, wards on furlough were changed from an institution status to other. Affected were 5 wards on furlough at the end of 1961.

[a] 1965 county populations were estimated from information provided by Department of Finance, Department of Education, and the California Taxpayers Association. Rates are based on age groups of 10–20 for all commitments; 10–17 for juvenile court commitments; and 18–20 for criminal court commitments.

[b] Rates omitted for counties with less than 10,000 population in the 10–20 year age group.

1965	1,634,573	1,551,764	50,713	32,096	67,870,167

[a] Benefits paid to individuals whose rights to UI, UCFE, UCV, or UCX benefits had expired or been exhausted. Federal Temporary Unemployment Compensation Act of 1958, Public Law 441, became effective July 1958 and payments were made through July 1959. Under the TUC Act, benefits were not payable for weeks of unemployment beginning on or after April 1, 1959. California Extended Duration Program—Part 3 of the Unemployment Insurance Code was added in 1959 to provide for payment of California extended duration benefits. An extended duration claim may be initiated in any month when the ratio of UI weeks claimed (including extended duration weeks) to covered employment averages 6% or more, in reference periods defined by the code. This situation first occurred in April 1960. Federal Temporary Extended Unemployment Compensation Act of 1961, Public Law 87-6, became effective in April 1961 and payments were made through December 1962. Under the TEC Act, benefits were not payable for weeks of unemployment beginning on or after July 1, 1962.

[b] Includes weeks compensated by UI only and Joint UI-UCFE and/or UCX benefits.

[c] Includes weeks compensated by UCFE only and joint UCFE-UCX benefits.

[d] Includes weeks compensated by UCX only.

[e] Payments made under the Federal TUC Program.

[f] Payments made under the California ED Program.

[g] Includes payments made under both Federal TEC and California ED Programs.

[h] Payments for 1963 and subsequent years made under the California ED Program.

UI—Unemployment Insurance.
UCFE—Unemployment Compensation for Federal Employees.
UCV—Unemployment Compensation for Veterans.
UCX—Unemployment Compensation for Ex-Servicemen.

1965	345,210	21,814	14,769,664

[a] Effective September 1944, the Servicemen's Readjustment Act of 1944 provided for the payment of allowances to unemployed veterans of World War II. On October 11, 1952, state agencies discontinued processing and paying servicemen's claims for readjustment allowances. Effective October 15, 1952, the Veterans Readjustment Assistance Act of 1952 provided for the payment of allowances to unemployed veterans who served in the Armed Forces sometime during the period June 27, 1950, to February 1, 1955. Unemployment compensation for veterans became inoperative with weeks of unemployment which began on or after February 7, 1960. Effective October 26, 1958, the Ex-Servicemen's Unemployment Compensation program provided unemployment insurance benefits for ex-servicemen who began their active service after January 31, 1955, or who were released from active service in the Armed Forces after October 27, 1958.

[a] A Medical Care Program for recipients of public assistance was put into effect in California in October 1957 and all expenditures for services received under this program are reported as "Medical Care." Medical care allowed as special needs in recipients' grants prior to October 1957 and grant allowances for services not covered by the Medical Care Program after October 1957 are included in "Subsistence"; data on expenditures for these medical services are not available.

[b] Based on recipients eligible for Public Assistance Medical Care.

[a] A Medical Care Program for recipients of public assistance was put into effect in California in October 1957 and all expenditures for services received under this program are reported as "Medical Care." Medical care expenditures for October-December 1957 includes aid to potentially self-supporting blind. Medical care allowed as special needs in recipients' grants prior to October 1957 and grant allowances for services not covered by the Medical Program after October 1957 are included in "Subsistence"; data on expenditures for these medical services are not available.

[b] Based on recipients eligible for Public Assistance Medical Care.

[a] General Home Relief is that form of General Relief given to persons in their home to meet one or more of the basic subsistence items of food, shelter, or clothing. The definition of GHR includes residents who are residing in the county. It does *not* include transients since they are by definition persons who are not residing in the county.

[b] Usual low month.

[c] Usual high month.

[a] County nonmedical assistance to recipients in their homes; excludes county supplemental aid to categorical aid recipients (Old Age Security, Aid to Needy Children, etc.)

[b] Includes General Home Relief and other programs administered by County Welfare Departments which are financed from county indigent funds. Generally excludes costs of county hospitals.

[c] Includes some medical and dental care, excluded from General Home Relief after July 1, 1940.

[d] Revised.

[a] A Medical Care Program for aid to needy disabled recipients was put into effect in California in October 1959 and all expenditures for services received under this program are reported as "Medical Care." Medical care allowed as special needs in recipients' grants prior to October 1959 and grant allowances for services not covered by the Medical Care Program after October 1959 are included in "Subsistence"; data on expenditures for these medical services are not available.

[b] Program effective October 1, 1967.

[c] Based on recipients eligible for Public Assistance Medical Care.

[a] Includes AFDC—Unemployed Segment.
[b] Includes supplemental aid from county funds.
[c] A Medical Care Program for recipients of public assistance was put into effect in California in October 1957 and all expenditures for services received under this program are reported as "Medical Care." Medical care allowed as special needs in recipients' grants prior to October 1957 and grant allowances for services not covered by the Medical Care Program after October 1957 are included in "Subsistence"; data on expenditures for these medical services are not available.
[d] Based on recipients eligible for Public Assistance Medical Care.

[a] Benefit payments being made at a given time with no deductions or with deductions amounting to less than a month's benefit. Not precisely equivalent to number of beneficiaries because prior to 1956, some persons received more than one check.

[b] Benefit amounts represent January payments.

[c] Includes old-age, wife's or husband's, widow's or widower's, and parent's benefits.

[d] Data as of February 1959; December 1958 data not published because of heavy workload due to legislative changes.

SECTION F.

EDUCATION

This section presents data compiled by the Bureau of Education Research of the California State Department of Education relative to public school enrollment, apportionment, personnel, and current expenditures for public school education. Higher education data relate to all public and independent colleges.

Actual enrollment. This term describes the number of pupils registered at specific periods during the school year. Enrollment information is collected once in the fall and again in the spring. The data given here are enrollments as of the fourth week of the fall semester. Prior to 1947, enrollments were reported on an accumulative basis rather than a point in time basis. Such data is not comparable and hence is not reported here. Accumulative enrollments prior to 1947 are available from the Bureau of Education Research upon request. The K-14 enrollments indicate kindergarten through grade fourteen; K-8, kindergarten through grade eight; high school enrollment includes grades nine through twelve; and junior college, grades thirteen and fourteen. Special enrollments, or enrollments in special classes, are defined by footnotes.

Detailed information on actual enrollments by individual grades, by county, on each classification included in the special enrollments and on the number of pupils on double sessions, are published semi-annually by the State Department of Education.

The higher education enrollments include the public junior colleges (also reported with public school enrollments), the state colleges, the University of California, and independent colleges and universities. The Bureau of Education Research began the first complete compilation of higher education enrollment data in 1954–55. Full-time enrollment includes enrollment in twelve or more units. Freshman means less than 30 semester units of recorded credit, sophomore from 30 to 59 units, junior from 60 to 89, senior means more than 90 units, and graduate students are students with a baccalaureate degree from a recognized four-year college.

A specific distribution of enrollments in higher education, in terms of distribution by year and by individual institutions, is published by the Department of Finance, Budget Division.

Apportionment average daily attendance. This is the average daily attendance which is used to apportion state school funds. For this purpose, the elementary average daily attendance includes kindergarten through grade eight, irrespective of the location of the grades. Accordingly, grades seven and eight in the junior high schools are included in the elementary level. The high school average daily attendance indicated in this table includes grade nine through twelve, irrespective of location, and the junior college grades thirteen and fourteen.

The apportionment average daily attendance is in the annual publication of the State Department of Education entitled *Apportionment of the State School Fund for the Fiscal year. . .* A detailed breakdown in terms of individual districts and in terms of county totals may be obtained from this source.

Apportionment of state funds to public schools. These figures give a distribution of the principal apportionment which includes both basic and equalization financial aid to each of the levels (elementary, high school, and junior college). Also included is the apportionment which is made to the county school service fund, i.e., the operation of the office of the County Superintendent of Schools. Since the state apportionment to schools is now being made based on current data, average daily attendance and assessed valuation, the apportionment for growth has been eliminated. Special apportionments include reimbursements for transportation, driver education, and excess cost for physically and mentally handicapped. A detailed explanation of each of these funds and the legal basis for its allocation is furnished in the annual publication of the State Department of Education entitled *Apportionment of the State School Fund for the Fiscal Year . . .*

Current expenditures. The figures given here include total expenditures made by the school districts from (1) local funds, raised chiefly through property taxes, (2) the monies apportioned to the districts by the State and, (3) Federal funds. These expenditures include only expenditures from the general fund of the school district, but do not include general fund expenditures for food services, community services and capital outlay. Special funds, such as building fund, bond interest and redemption, etc., are not included. Expenditures are furnished in terms of district organization, i.e., the expenidtures in terms of the elementary districts, high school districts, junior college districts, and unified districts. The unified district column indicates the total expenditures for unified districts, including all levels which are encompassed by unified districts. In some instances this is kindergarten through grade twelve, and in other instances, kindergarten through fourteen. All of the expenditures of the unified districts are included in this column and are not indicated in the other column designations.

Full-time personnel. This figure is the total number of full-time personnel in the public schools, exclusive of substitute or other part-time teachers. The number of full-time personnel in California public schools are available in *Salaries of Certificated Employees in California Public Schools*, published annually by the Bureau of Education Research.

TABLE F-1

SELECTED EDUCATIONAL STATISTICS, 1960 U.S. CENSUS OF POPULATION: COMPARISON OF CALIFORNIA AND THE UNITED STATES

	California	United States
Median school years completed by persons 25 years of age and older, 1960	12.1	10.6
Percent of population 25 years of age and older with less than 5 years of school, 1960	5.7	8.4
Percent of population 25 years of age and older with at least 4 years of high school, 1960	51.5	41.1
Percent of population 25 years of age and older with at least 4 years of college, 1960	9.8	7.7
Percent of children in elementary school enrolled in private school, 1960	10.7	14.4
Percent of population 14–17 years of age enrolled in school, 1960	89.7	87.4
Percent of employed persons classified as professional, technical, and kindred workers, 1960	13.7	11.2

SECTION G.

RESOURCE INDUSTRIES

This section presents data relating to five of the basic resources of California: water, agriculture, forestry, fishing, and mining. The descriptive section below includes a brief summary of the series covered and sources for additional information.

Water

Tables G-1 to G-16 present summary information describing the uses to which land is put in California, the land area receiving water service, and the distribution of the available water supply of the State. Whenever possible, the information is given by hydrologic study areas, which have been outlined in the plate on page 112.

The following is a general statement describing water conditions throughout the State during the 1964–65 water year, adapted from the introduction to the Department of Water Resources' Bulletin No. 120–65, *Water Conditions in California—Fall Report,* October 1, 1965.

Water Conditions in California, 1964–65. There was marked improvement in water conditions during the 1964–65 water year which, in many areas, was the wettest since 1958. In the major water-producing watersheds of Northern California, precipitation was 135 percent of average with more than half of the water year total occurring during the months of December and January. While these rains produced the most devastating floods of history in the North Coastal area, they virtually assured adequate water supplies for 1965 in all of Northern California. In South Coastal California, however, precipitation was only 85 percent of average. While this indicates a continuation of local drought conditions, a principal source of water supply for Southern California—the Colorado River—experienced an above average year; water year runoff for the Colorado River was nearly 120 percent of normal and carryover storage in major reservoirs in the basin at the end of the water year was 6,000,000 acre-feet greater than one year ago.

Precipitation during the summer months does not normally have a material effect on the overall status of California's water supplies. August of 1965, however, brought unseasonal amounts of rainfall to most areas of the State. Record and near record totals were received at inland stations throughout Northern California with the heaviest amounts being recorded in Central Sierra and Cascade watersheds. These record-breaking rains greatly reduced irrigation requirements and contributed significantly to the unprecedented carryover storage in surface reservoirs at the end of the water year.

Streamflow in major watersheds of California during the year was the heaviest since 1958. The North Coastal and Central Valley areas experienced 165 and 150 percent of normal runoff, respectively. Runoff was also well above normal in the San Francisco Bay and Lahontan areas, but was less than 50 percent of normal in the South Coastal area. The total runoff for the entire State, estimated to exceed 100,000,000 acre-feet, was about 150 percent of average. The magnitude of the December and January storms is made more apparent by noting that nearly 50 percent of the water year runoff for the State occurred during these two months. This, of course, was largely due to the record December and near record January flows in North Coastal and Sacramento Valley streams. Runoff in Central Valley streams during the snowmelt period, April through July, generally ranged between 115 and 120 percent of normal.

There was a net increase of stored water in major reservoirs during this water year of 4,500,000 acre-feet which brought the total contents of these reservoirs up to 14,500,000 acre-feet on October 1, 1965. This amounts to 65 percent of their combined capacities, 120 percent of average and represents the greatest carryover storage of record for California reservoirs.

Ground water conditions throughout the State also showed general improvement. North of the Tehachapis, the downward trend in water levels was temporarily arrested, if not reversed, with most basins experiencing net rises in the water table. In Southern California, levels at the end of the water year were about the same as one year ago.

At the end of the 1964–65 water year, the status of water supplies, while generally excellent throughout California, was especially favorable in the vital Central Valley watersheds. In these basins, the fruits of one of the best water years of record permitted near optimum operation of major reservoirs and multipurpose projects during the spring runoff and irrigation seasons. Consequently, even if the 1966 water year were to approach the minimum of record, careful management would preclude the occurrence of critical water shortages in areas dependent upon Central Valley supplies.

Publications. Much more information on water resources and utilization is available in the several publications of the Department of Water Resources quoted as sources for most of the tables included in this section. In addition, a large amount of specific information is included in reports of other general and special investigations by the Department. A price list of publications in print is available upon request to the Department of Water Resources.

Agriculture

Data presented in this section, with the exception of United States Census data, are official estimates of the United States and California Departments of Agriculture. Current estimates are available in greater detail in reports issued by the Bureau of

Agricultural Statistics, which also contain more detailed statistics. Data for many agricultural commodities are available for varying numbers of years preceding those shown in the tables. Data for 1965 are preliminary estimates.

Minor crops for which estimates are not prepared are not included in the "all field crops," "all fruit and nut crops," "all bushberry crops" and "all vegetable crops" categories in the tables. Certain information for some items does not appear in the tables because estimates are not applicable or were not made for the specific crop. For example, cottonseed is harvested from the same acreage as cotton lint, therefore acreage estimates are not published for cottonseed. Another example is corn for forage, for which separate production and value data are not estimated.

Years designated. The years designated for crops are "crop years", not calendar years. Planting or blooming may have started in the preceding year and marketing may have extended into the following year. Price and value data for livestock and poultry products, except wool, pertain to marketings in the year specified. Production data for livestock and poultry products are for calendar years.

Prices. Estimates of prices received by farmers generally represent composite averages of all grades, classes and methods of sale for the State as a whole. Prices for vegetables for fresh market represent the average paid for the packed products loaded at f.o.b. position. Prices for fruit and nuts are on the basis of naked fruit at growers' first delivery point.

Production of no value. Occasionally a portion of the production of a crop has no value. When this occurs, that portion without value is excluded from computations of average unit value and total value.

Forestry

Forestry is one of the most important enterprises in California and represents a significant proportion of such activities in the nation. The State contains 42.5 million acres of forest land, ranking first in the United States. More than 17 million acres are capable of producing commercial forest crops. California has the second largest U.S. volume of standing timber.

About 16% of United States lumber production and substantial quantities of other wood products are manufactured in California. The State ranks second in timber cutting, second in lumber production, and third in plywood manufacture. In 1963 it was estimated that California ranked first in value of forest products sold and first in number employed in the timber industry with 108,000 employees. There are approximately 1400 timber operators, 300 sawmills, 49 veneer and plywood plants including 24 softwood producers, eight wood pulp mills, four particle board plants, one hardboard plant and many secondary wood using industries, e.g. planing mills, furniture, and paper, in California. It has been estimated that nearly 2.3 billion dollars was added to the economy in all timber-based economic activities in California in 1958. See Section H on manufacturing for statistics on employees and product value.

These industries are dependent upon a renewable resource—growing crops of trees—recognized as good business. Forests are vital to California also for watershed protection, recreation, and fish and wildlife.

More detailed data than that contained in the following tables are contained in *Forest Statistics for California* (Berkeley, 1954), *California's Timber Industries: Some Facts and Figures* (Berkeley, 1959), *A Century of Lumber Production in California and Nevada* (Berkeley, 1953) published by Pacific Southwest Forest and Range Experiment Station of U. S. Forest Service. See also *Production of California Timber Operators in 1964* (Sacramento, 1966) of California Division of Forestry and various U. S. Bureau of Census reports cited in the tables. Information concerning potential of woodpulp industry and waste disposal is found in *Waste Treatment and Disposal Aspects to Development of California's Pulp and Paper Industries* (Sacramento, 1957) published by State Water Quality Control Board.

The Economic Importance of Timber in the United States (Washington, D.C., 1963) published by the U. S. Forest Service contains estimates of value added and employment for timber-based economic activities. *Economic Development Prospects for the Commercial Forest Resources and Forest Products Industries of California* (Berkeley, 1963) a Report to the State Office of Planning published by the University of California School of Forestry contains much information on the forest resource and related industries including regional breakdowns of ownership, production, and resource data.

Timber Trends in the United States (Washington D.C., 1965) published by the U.S. Forest Service contains numerous statistics on California's timber industries and in addition is an appraisal of the timber situation and outlook in the United States.

Fishing

This section presents statistics of quantity, value, species, and disposition of fish caught for commercial and recreational purposes.

Information relative to fisheries and the recreational use of wild life is available from the Department of Fish and Game. Data are published regularly in the annual *Statistical Report of Fresh, Canned, Cured and Manufactured Fishery Products;* annually in *The California Marine Fish Catch* (*Fish Bulletin* series); in the *Monthly Statewide Report of Receipts and Case Pack, Tuna and Other Species;* and in the monthly *Report of the California Party Boat Fleet* (sportcatch).

Mining

These tables present summary statistics of the quantity and value of mineral production in California, compiled by the Division of Mines and Geology and the Division of Oil and Gas, California Department of Conservation. More detailed figures are available from these agencies.

The monthly publication, *Mineral Information Service*, provides information on geology and mineral resources of California, the usefulness of minerals and rocks, and mineral production statistics.

In addition to this monthly release, the Division of Mines also issues the Report of the State Geologist and

a number of other publications. The most recent edition of *Mineral Commodities of California* was released in 1957 as Bulletin 176. It gives information on the geologic occurrence, economic development, and utilization of the State's mineral resources.

Detailed statistics on petroleum and natural gas production are published by the Division of Oil and Gas in the semiannual *Summary of Operations, California Oil Fields,* and the monthly *Oil and Gas Production Report,* both free.

Statistics of mineral operations in California will also be found in the reports of the U.S. Bureau of Mines and the Census of Mineral Industries published by United States Bureau of the Census. The latest census was conducted for 1963.

TABLE G-1

TOTAL ACREAGE AND ACREAGE RECEIVING WATER SERVICE,[a] BY HYDROLOGIC STUDY AREA, CALIFORNIA, 1960

(In thousands)

Hydrologic Study Area	Total acreage	Acreage receiving water service	
		Gross irrigated[b]	Urban and suburban[c]
Total	100,500	8,550	2,068
North Coastal	11,390	270	44
San Francisco Bay	3,650	170	443
Central Coastal	7,220	390	80
South Coastal	7,000	505	998
Sacramento Basin	16,600	1,490	178
Delta-Central Sierra	3,200	750	47
San Joaquin Basin	6,990	1,220	64
Tulare Basin	11,060	2,870	149
North Lahontan	3,790	130	4
South Lahontan	17,180	95	25
Colorado Desert	12,420	660	36

[a] Based on land and water use surveys conducted by the Department of Water Resources, indicative of 1960 level of development.
[b] Includes farm lots and minor included acreages not receiving water service, such as roads, railroads, rights of way and other nonagricultural parcels of land.
[c] Estimated from population and density data.

TABLE G-2

MEAN ANNUAL RUNOFF OF CALIFORNIA STREAMS, BY HYDROGRAPHIC AREA[a]

(In thousand acre-feet)

Area	Annual runoff[b]	Percent of total
Total	70,798	100.0
North Coastal[c]	28,886	40.8
San Francisco Bay[c]	1,245	1.8
Central Coastal	2,448	3.4
South Coastal	1,227	1.7
Central Valley	33,636	47.5
Sacramento River Basin	*22,390*	31.6
Tulare Lake Basin	*3,313*	4.7
San Joaquin River Basin	*6,386*	9.0
Delta tributary area[d]	*1,547*	2.2
Lahontan	3,177	4.5
Colorado Desert	179	0.3
Colorado River above Gila River	[e]16,182	

[a] Hydrographic Areas correspond essentially to Hydrologic Study Areas, except as indicated in footnote "c" below. North and South Lahontan combined.
[b] Estimated average natural runoff for water years 1894–95 to 1946–47. Water year is 12 months ending September 30.
[c] Runoff of Russian River Basin and Salmon Creek Group (the latter tributary to Bodega and Tomales Bays), amounting to 1,743 thousand acre-feet, included in North Coastal total.
[d] Corresponds essentially to Delta-Central Sierra Hydrologic Study Area.
[e] Estimated average natural runoff for water years 1904–05 to 1947–48.

[a] Indices are based on averages for various periods of record.
[b] Twelve months ending September 30 of indicated year.
[c] Indicated calendar year.
[d] Snowpack is not normally a significant factor to water conditions in this area.
[e] Including Delta and its tributaries.

[a] Selected streams, generally indicative of water supply. All runoff data preliminary, subject to revision.
[b] Measured flow, adjusted for upstream storage, diversions, and imports.
[c] Snowmelt period; indicates adequacy of water supplies.
[d] Period generally between successive annual low flows.
[e] 1910–11 through 1959–60; estimates for stations having shorter records obtained by correlation with nearby long-term stations.
[f] Nonsnowmelt stream.
[g] Measured flow, not adjusted for upstream regulation.
[h] Including Delta tributaries.
[i] Adjusted for regulation of Upper Colorado Storage Project Reservoirs.
[j] 38-year mean, 1922–23 through 1959–60.

[a] Cubic feet per second; instantaneous flow at sampling point, except as indicated in "e" and "f" below.
[b] Parts per million, indicating dissolved mineral content.
[c] Station relocated to *near Orleans* in July 1964.
[d] Estimated.
[e] Mean daily flow.
[f] Flow, American River below Nimbus Dam.

TABLE G-7

AGGREGATE GROSS CAPACITIES OF RESERVOIRS IN CALIFORNIA,[a] BY HYDROGRAPHIC AREA [b]
January 1, 1966

(in acre-feet)

Hydrographic area	Aggregate capacity [c]
Total	35,729,130
North Coastal [d]	3,887,342
San Francisco Bay [d]	893,010
Central Coastal	1,279,400
South Coastal	1,955,713
Central Valley	25,467,208
Sacramento Basin	*(16,160,702)*
San Joaquin-Tulare Lake Basin [e]	*(9,306,506)*
Lahontan	1,416,457
Colorado Desert [f]	830,000

[a] All reservoirs in California with gross capacities of 1,000 acre-feet or more. Includes reservoirs constructed by federal agencies, as well as those constructed by local agencies, concerns and persons
[b] Hydrographic Areas correspond essentially to Hydrologic Study Areas, except as indicated in footnotes "d" and "e," below. North and South Lahontan combined.
[c] Totals include reservoirs under construction.
[d] Reservoirs of Russian River Basin and Salmon Creek Group (the latter tributary to Bodega and Tomales Bays) included in North Coastal total.
[e] Includes Delta-Central Sierra Hydrologic Study Area.
[f] Includes Parker Reservoir on Colorado River.

MAJOR DAMS AND RESERVOIRS OF CALIFORNIA—Continued

Name of dam	Stream	County	Builder[a]	Completed	Type	Height (in feet)	Reservoir capacity (acre-feet)	Purpose of dam[b]	Use of water[c]
Santa Felicia	Piru Creek	Ventura	United Water Conservation District	1955	Earth	200	100,000	Stor.	Dom., irr., pwr., mun., ind.
San Vicente	San Vicente Creek	San Diego	City of San Diego	1943	Gravity	199	90,234	Stor., div.	Dom., mun.
Little Grass Valley	South Fork Feather	Plumas	Oroville-Wyandotte ID	1961	Rockfill	198	93,010	Stor.	Dom., irr., pwr., mun.
Lake Loveland	Sweetwater River	San Diego	California Water and Telephone Company	1945	Variable radius arch	198	27,700	Stor., div.	Dom., irr., ind., mun.
Cachuma	Santa Ynez River	Santa Barbara	USBR	1953	Earth and rock	197	204,900	Mult. purp.	Irr., mun.
Iron Canyon	Cedar Salt Log Creek	Shasta	PG&E	1965	Earth	196	24,300	Stor., div.	Pwr.
San Joaquin Reservoir	Trihutary Bonita Creek	Orange	Irvine Ranch Water District	1965	Earth	196	3,036	Stor.	Mun., dom.
New Hogan	Calaveras River	Calaveras	USCE	1964	Earth and rock	195	320,000	Mult. purp.	Irr., rec.
James H. Turner	San Antonio Creek	Alameda	City and County of San Francisco	1964	Earth	195	50,500	Stor.	Mun., dom.
Mulholland	Weid Canyon	Los Angeles	City of Los Angeles	1924	Gravity	195	4,036	Stor.	Dom., mun.
Spring Creek Debris	Spring Creek	Shasta	USBR	1963	Earth	194	5,874	Deb. cont.	----
Whale Rock	Old Creek	San Luis Obispo	CDWR	1960	Earth	193	40,000	Stor.	Mun., dom., irr.
Bullards Bar	North Fork Yuha	Yuha	PG&E	1924	Variable radius arch	193	31,489	Stor., div.	Pwr.
Lake Arrowhead	Little Bear Creek	San Bernardino	Lake Arrowhead Development Company	1922	Hydraulic fill	190	47,000	Stor.	Dom., irr., rec.
Upper San Leandro	San Leandro Creek	Alameda	EBMUD	1926	Hydraulic fill	190	41,436	Stor., div.	Dom., mun.
Bouquet Canyon	Bouquet Creek	Los Angeles	City of Los Angeles	1934	Earth	190	36,505	Stor.	Mun.
Copper Basin	Copper Basin River	San Bernardino	MWD	1938	Variable radius arch	190	22,000	Stor.	Mun.
Melones	Stanislaus River	Calaveras	Oakdale & South San Joaquin ID	1926	Constant radius arch	186	112,500	Stor.	Irr., pwr.
Isabella	Kern River	Kern	USCE	1953	Earth	185	570,000	Mult. purp.	Irr., rec.
Shaver Lake	Stevenson Creek	Fresno	Southern California Edison Company	1927	Gravity	180	135,283	Stor., div.	Pwr.
Camp Far West	Bear River	Placer	South Sutter Water District	1928	Earth	175	150,000	Stor.	Irr.
Vermilion Valley	Mono Creek	Fresno	Southern California Edison Company	1954	Earth	167	125,000	Stor.	Dom., pwr.
Coyote	East Fork Russian	Mendocino	USCE	1959	Earth	160	122,500	Mult. purp.	Irr., mun., dom., ind., rec.
Camanche	Mokelumne River	San Joaquin	EBMUD	1963	Earth	140	431,500	Stor., fl. cont.	Mun.
Black Butte	Stony Creek River	Tehama	USCE	1963	Earth	135	160,000	Fl. cont.	Irr., rec.
Lake Almanor	North Fork Feather	Plumas	PG&E	1927	Hydraulic fill	130	1,308,000	Stor. div.	Irr., pwr.
Long Valley	Owens River	Mono	City of Los Angeles	1940	Earth	126	183,465	Stor.	Irr., pwr., dom.
Henshaw	San Luis Rey River	San Diego	Vista ID	1923	Hydraulic fill	123	203,581	Stor.	Irr.
Bucks Creek	Bucks Creek	Plumas	PG&E	1928	Rockfill	122	103,000	Stor.	Irr., pwr.
Prado	Santa Ana River	Riverside	USCE	1941	Earth	106	223,000	Fl. cont.	----
Parker	Colorado River	San Bernardino	USBR	1938	Variable radius arch	85	717,000	Stor., fl. cont.	Pwr., mun.
Clear Lake Impounding	Cache Creek	Lake	Clear Lake Water Company	1914	Gravity	32	420,000	Stor.	Irr., rec.
Clear Lake	Lost River	Modoc	USBR	1910	Earth and rock	28	527,000	Stor., fl. cont.	Irr., rec.
Lake Tahoe	Truckee River	Placer	USBR	1913	Slah and huttress	16	732,000	Stor. reg.,	Irr., pwr., rec.
Buena Vista	Kern River	Kern	Kern County Land Company	1890	Earth	12	205,000	Stor.	Irr.

EXPLANATORY NOTE: This list of 84 major dams in California includes only those which are over 190 feet high or have reservoirs of at least 100,000 acre-feet capacity. There are more than 1,000 dams within the safety jurisdiction of the State, which is exercised over dams which are 25 feet or more high, storing more than 15 acre-feet of water, or, which are more than 6 feet high storing at least 50 acre-feet. Federally operated dams, 21 of which are listed here, are exempt from State safety supervision.

The "height" listed is the vertical distance from the crest of the dam to the original streambed at the downstream toe of the dam.

[a] List of abbreviations (Builder):
USBR—United States Bureau of Reclamation
CDWR—California Department of Water Resources
USCE—United States Corps of Engineers
MCFC&WCD—Monterey County Flood Control & Water Conservation District
PG&E—Pacific Gas and Electric Company
SCVWCD—Santa Clara Valley Water Conservation District
LACFCD—Los Angeles County Flood Control District
MWD—Metropolitan Water District of Southern California
ID—In name of builder refers to Irrigation District
EBMUD—East Bay Municipal Utility District
SMUD—Sacramento Municipal Utility District

[b] List of abbreviations (Purpose of dam):
Mult. purp.—Multiple purpose
Stor.—Storage
Div.—Diversion
Reg.—Regulation
Fl. cont.—Flood control
Deb. cont.—Debris control

[c] List of abbreviations (Use of water):
Irr.—Irrigation
Pwr.—Power
Rec.—Recreation
Mun.—Municipal
Dom.—Domestic
Ind.—Industrial

Department of Water Resources

TABLE G-9

ESTIMATED ANNUAL REQUIREMENTS FOR WATER, BY HYDROLOGIC STUDY AREA, CALIFORNIA, 1960

(In thousand acre-feet)

Hydrologic study area	Type of water service	
	Irrigation	Urban and suburban
Total	28,480	3,260
Northb Coastal	420	20
San Francisco Bay	330	590
Central Coastal	660	110
Southb Coastal	1,080	1,640
Sacramento Basin	5,900	250
Delta-Central Sierra	2,960	100
San Joaquin Basin	4,620	130
Tulare Basin	7,600	300
North Labontan	400	10
Southb Lahontan	410	50
Colorado Desert	4,100	60

Note: Water requirements listed here correspond to acreages receiving water service, as shown in Table G-1. Footnotes [a] and [b] of that table apply to this table as well. Urban and suburban requirements are based on population and per capita use data.

TABLE G-10

MUNICIPAL WATER SUPPLIES AND DELIVERIES,[a] REPRESENTATIVE CITIES AND AGENCIES 1959-60 TO 1963-64

(In millions of gallons)

City or district	Source reference	Year[b]				
		1960–61	1961–62	1962–63	1963–64	1964–65
Eureka	1	1,094	1,093	1,530	1,562	1,805
Santa Rosa	1	2,154	2,319	2,246	2,446	2,678
San Francisco [c]	2	28,829	30,265	29,252	30,440	32,300
East Bay Municipal Utility District [d]	3	51,712	54,457	52,925	56,380	59,612
Santa Barbara	1	3,948	3,787	3,691	4,011	3,928
San Jose Water Works [e]	6	16,686	18,530	19,945	19,615	23,299
Metropolitan Water District of Southern California [f]	4	304,745	303,626	332,635	346,830	365,555
Long Beach	1	17,653	16,448	16,746	17,811	17,890
Los Angeles	1	173,117	164,771	163,112	171,263	168,564
San Diego [c]	5	27,484	26,445	29,270	30,125	30,966
Redding	1	1,332	1,390	1,325	1,436	1,341
Sacramento	1	17,430	17,877	15,436	18,000	21,000
Fresno	1	19,138	19,903	18,277	19,280	19,516
Susanville [e]	6	536	547	523	[e]486	531
Bishop	1	558	479	462	445	464
El Centro	1	1,559	1,576	1,652	1,514	1,628

[a] Gross water supplies or net water deliveries.
[b] Fiscal year—July 1 to June 30 of successive calendar years.
[c] Within city limits.
[d] Metered consumption within area normally served.
[e] Quantities for calendar year (first year indicated in each column heading).
[f] Total deliveries of Colorado River water. Includes part of water supply for Long Beach, Los Angeles, and San Diego, listed above.

	1964	309,000	bu.	26.7	8,237,000	1.46	12,061,000
	1965	295,000	bu.	26.5	7,825,000	1.45	11,375,000

[a] Cleaned basis, yield in pounds, production in cwt.
[b] Yield in pounds net lint; production in 500 pounds gross weight bales; price on cwt. basis.
[c] Produced on the same acreage as estimated for cotton lint.
[d] Yield in pounds.
[e] Price on a hundredweight basis.
[f] Estimates discontinued.
[g] Related to year of harvest. It also includes some acreage carried over and harvested the following spring. Prices include "support" payments but do not include Government payments under the Sugar Act. 1965 price and value are based on U.S. average price.

SECTION H.

MANUFACTURING

This section presents data on manufacturing industries summarized from the U.S. Census of Manufactures and the annual surveys conducted by the United States Department of Commerce, Bureau of the Census. Detailed information for individual industries and local areas is available in the published reports of the Bureau of the Census.

Except for 1958 and 1963, the statistics are based on sample surveys. In 1958 and 1963 complete censuses were taken.

Definitions

All employees—Includes all full-time and part-time employees on the payroll of the operating establishment. For 1959-62, all employees represent the average number of production workers employed for the payroll period ended nearest the 15th of March, May, August, and November plus all other employees for the payroll period ended nearest the 15th of March. For 1958 and for 1963, it represents an average of reported employment totals for the payroll period ended nearest the 15th of March, May, August, and November. The figures include data for central administrative offices and auxiliary establishments.

Payroll—Includes all forms of compensation (salaries, wages, commissions, bonuses, vacation pay, and other remuneration) paid during the year to all employees of the establishment. Payroll is reported before deductions for Social Security, income tax, group insurance, union dues, etc.

Production workers—Includes workers engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping (but not delivering), maintenance, repair, janitorial, watchman services, product development, auxiliary production for plants' own use (e.g., power plant), record keeping, and other services closely associated with these production operations at the establishment covered by the report. Supervisory employees above the working foreman level are excluded from this category.

Wages—Consists of that portion of the payroll paid to production workers.

Value added by manufacture—Derived by subtracting the cost of raw materials, parts and components, supplies, fuels, purchased electricity, goods purchased for resale, and contract work from the value of shipments of manufacturing establishments in each industry and adjusting for the net change in finished goods and work-in-process inventory between the beginning and end of the year plus the value added in merchandising activities of manufacturing establishments.

New capital expenditures—Includes, for all manufacturing plants in operation and under construction: expenditures for new structures and additions (including major alterations, capitalized repairs, and improvements) to the manufacturing plant, whether on contract or by the plant's own work force; new machinery and new equipment; and capitalized repairs and improvements to existing machinery and equipment. Excluded from the new expenditures total are those expenditures for "used" plant and equipment acquired from others, and expenditures for land.

SECTION I.

DEFENSE-AEROSPACE

Information on California's largest single manufacturing sector, defense-aerospace, is obtained primarily from reports of the U.S. Department of Defense (DOD), the National Aeronautics and Space Administration (NASA), and the California Department of Industrial Relations. Material from these and other sources has been summarized by the Department of Finance, Budget Division.

Table I-1 summarizes all DOD prime awards for procurement actions of $10,000 or more, and includes those for research and development (R&D), shown separately in Table I-2. NASA totals include awards of $10,000 or more for R&D and to educational and nonprofit institutions, and of $25,000 or more for all other contracts.

Prime contract awards are given to the manufacturer who will assume primary responsibility for coordination, testing, production or similar activities related to a project. The primary contractor, in turn, generally sub-contracts to other firms approximately half the initial award. These subcontracts may or may not be made to other firms in the state of the primary contractor. Adequate information is not available by which to determine the overall position of California firms in DOD and NASA primary and subcontracting.

The information on scientists was gathered by the National Science Foundation through a mail questionnaire, sent to members of 12 scientific societies cooperating with the Foundation. Persons belonging to these societies have been classified as scientists and have been included in the National Register of Scientific and Technical Personnel. Of the 1964 respondents, 35 percent reported a doctorate as the highest degree, 27 percent had a master's degree and 32 percent held a bachelor's degree. Because of the substantial number of nonrespondents and incomplete coverage of the scientist population, the data on scientists should not be regarded as the total number of persons in the professional activities listed.

SECTION J.

CONSTRUCTION

This section presents annual statistics on California building permits issued for housing units and various types of other construction. These statistics are compiled by the Bureau of the Census, U.S. Department of Commerce. Two sets of building permit data are currently reported by the Bureau of the Census. One set is based on approximately 12,000 permit issuing places known in the United States; the other set relates to 3,014 selected permit-issuing places in which permits were issued for at least 50 housing units during 1959. In 1964 these selected places accounted for 85 percent of all housing units authorized in the United States.

Because various data in the 3,014-place series are reported more frequently, in greater detail, and are regularly published in the *Construction Review*, the detailed data on value of permits included in the tables that follow are based on these series. For California these data series are obtained from 245 of approximately 400 permit offices in the State, and in 1965 represented about 94 percent of the housing units authorized in the State. The number of residential units shown for metropolitan areas in Table J-5 is based on the 12,000 permit-issuing place series.

Current monthly data on new residential construction authorized in permit-issuing places for the United States, California and local areas are given in various construction reports, published by the Bureau of the Census. Detailed description of building permit data is available in the 1965 summary statistics of the Bureau's publication: *Housing Authorized in Permit-Issuing Places* (C-42-65-13).

Private new nonresidential construction data for California has been prepared from special tabulations furnished by the Bureau of the Census, Construction Statistics Division.

TABLE J-1

CALIFORNIA BUILDING PERMIT ACTIVITY: VALUATION BY TYPE OF BUILDING CONSTRUCTION, 1960–65 [a]

(In millions)

Type of building construction	1960	1961	1962	1963	1964	1965
All building construction	$3,410.7	$3,692.5	$4,320.2	$5,074.9	$4,834.6	$4,371.5
New housing units	2,127.1	2,354.7	2,776.7	3,466.1	3,160.8	2,483.5
New nonhousekeeping	49.8	50.2	59.0	62.0	67.3	52.8

SECTION K.

TRANSPORTATION

Statistics relating to the mileage of roads, expenditures to construct and maintain these roads, gallons of fuel used, and traffic and accident data on all freeways and on rural State highways are maintained and were compiled for publication by the Urban Planning Department of the Division of Highways, Department of Public Works.

The Highway Planning Survey inventoried all roads outside the incorporated areas during the period 1949-55. The counties are required to maintain the inventory of the roads under their jurisdiction and report changes in mileage in May of each year. Roads outside cities not maintained by the State or counties, shown in the accompanying tables, are based on the 1949-55 inventory.

The accident statistics contained in this report are based upon fatal and injury accidents involving a motor vehicle. The reports from which these statistics are compiled are those required to be reported to the California Highway Patrol under Section 20008 of the Vehicle Code. Accidents involving "property damage only" are not required to be reported and, consequently, do not reflect an accurate total.

In addition to the accident data contained in this report for 1965, the Department of California Highway Patrol also received an additional 3,411 reports of motor vehicle accidents which occurred on private property. These accidents resulted in death for 231 persons and injury to 3,991 persons.

World Trade Statistics

The dollar value of foreign trade, as compiled by the United States Department of Commerce, is presented for the three customs districts: Los Angeles, San Diego, and San Francisco.

Leading exports are: machinery and vehicles, food, textile fibers and manufactures, chemicals and related products, metals and manufactures except machinery.

Leading imports are: food, machinery and vehicles, nonmetallic minerals, metals and manufactures except machinery, and wood and paper.

The statistics on tonnage of inbound and outbound oceanborne cargo were prepared by the United States Army, Corps of Engineers.

Other information sources on California world trade and shipping are the Los Angeles World Trade Center Authority, the San Francisco World Trade Center Authority, and the San Francisco Port Authority. All are State of California agencies.

TABLE K-1

STATE HIGHWAY MILEAGE,[a] BY SURFACE TYPE, DECEMBER 31, 1965

Surface type	Total	Outside cities	Inside cities
Total	16,598.227	14,225.981	2,372.246
Total constructed road	14,215.328	12,248.924	1,966.404

TABLE K-10

REGISTRATION OF MOTOR VEHICLES AND TRAILERS IN CALIFORNIA, BY VEHICLE TYPE, 1960–65

Type of vehicle	1960	1961	1962	1963	1964	1965
Total	8,681,162	9,007,869	9,758,075[c]	9,990,626	10,707,843	11,333,337
Rate per 100 persons[a]	53.7	53.7	56.1	55.6	56.9	59.5
Exempt[b]	111,867	118,009	110,570	121,617	132,606	142,138
Non-exempt	8,569,295	8,889,860	9,647,505[c]	9,869,009	10,575,237	11,191,199
Passenger vehicles	6,751,313	6,982,930	7,549,332	7,805,255	8,187,597	8,586,371
Commercial vehicles	982,821	1,029,816	1,135,161	1,097,140	1,259,431	1,352,464
Trailers and semi-trailers	525,667	544,816	579,720	555,333	609,741	645,004
Trailer coaches	233,904	249,087	276,951	261,022	314,172	342,705
Motorcycles	75,590	83,211	106,341	150,259	204,296	264,655

[a] Estimated California total population at the end of each calendar year. Source: Financial and Population Research Section, Department of Finance.
[b] Vehicles publicly and privately owned not subject to license fees.
[c] 1962 renewal totals are somewhat inflated as a result of increased early renewals in 1962 due to the issuance of new vehicle license plates for the 1963 registration year.

1965	178,466	33,756	92,813	42,621	9,276

[a] Formal action placing the driver on notice of the imminence of suspension or revocation upon continued violation.
[b] Temporary withdrawal of the driving privilege with the surrender during the term of suspension of all licenses. At the end of the suspension the license is returned.
[c] Person's driving privilege is terminated and all licenses issued must be surrendered. The revocation is for an indefinite period and must be ended by the Department, at which time the applicant must apply for and be issued a new license before driving.
[d] License certificate is withdrawn without prejudice and must be surrendered. Any person whose license has been cancelled may immediately apply for a license.

NOTE: See Table E-28 for additional details.

VALUE OF IMPORTS AND EXPORTS THROUGH CALIFORNIA PORTS, BY CUSTOMS DISTRICT, BY ALL MODES OF TRANSPORTATION, 19SS–6S

Year	California	Customs District		
		San Francisco [a]	Los Angeles [b]	San Diego [c]
Imports				
1955	$718,429,688	$371,750,413	$324,266,706	$22,412,569
1956	865,082,850	437,285,209	410,612,353	17,185,288
1957	1,004,144,765	465,204,544	512,600,471	26,339,750
1958	991,423,844	444,761,648	516,404,015	30,258,181
1959	1,288,826,738	525,416,128	727,015,753	36,394,857
1960	1,249,786,009	520,342,755	685,431,167	44,012,087
1961	1,227,391,472	496,770,473	686,675,050	43,945,949
1962	1,449,325,679	546,595,435	847,070,756	55,659,488
1963	1,518,500,000	572,400,000	892,100,000	52,000,000
1964	1,695,600,000	636,000,000	1,002,900,000	56,700,000
1965	1,958,700,000	704,400,000	1,191,900,000	62,400,000
Exports				
1955	901,777,591	453,005,103	363,613,666	85,158,822
1956	1,038,642,570	538,137,855	409,389,790	91,114,925
1957	1,203,826,706	601,441,529	500,982,619	101,402,558
1958	1,004,566,604	546,272,704	366,439,947	91,853,953
1959	972,989,565	547,442,734	341,244,920	84,301,911
1960	1,387,963,864	721,437,373	550,018,381	116,508,110
1961	1,434,239,609	732,591,430	577,556,839	124,091,340
1962	1,345,597,676	759,836,313	470,396,649	115,364,714
1963	1,672,600,000	890,900,000	610,000,000	171,700,000
1964	1,705,100,000	868,100,000	657,200,000	179,800,000
1965	2,077,300,000	1,115,200,000	780,900,000	181,200,000

[a] Includes the Ports of Eureka, Carquinez Strait, San Pablo Bay, Richmond, Oakland, Redwood City, San Francisco, Moss Landing, Monterey, San Joaquin River, Stockton, Sacramento, Suisun Bay Channel, Crescent City, and other San Francisco coastal ports.
[b] Includes the Ports of Los Angeles, Long Beach, Newport Bay, Santa Barbara, Morro Bay, El Segundo, Santa Monica, Port Hueneme, Ventura, Carpinteria, Ellwood, Capitan, Gaviota, San Luis Obispo, Estero Bay, Avalon, Huntington Beach, Encina, and other Los Angeles ports.
[c] Ports of San Diego.

TABLE K-25

WATERBORNE OCEAN CARGO [a] TRAFFIC THROUGH CALIFORNIA PORTS, BY CUSTOMS DISTRICT, 1964

(In short tons)

Customs District and year	Total ocean traffic	Foreign [b]		Domestic [c]	
		In-bound	Out-bound	In-bound	Out-bound
Total state	77,959,729	19,418,178	14,175,395	20,431,264	23,934,892
San Francisco [d]	32,286,447	7,204,529	5,914,795	11,369,798	7,797,325
Los Angeles [e]	44,228,656	11,884,814	7,813,675	8,413,950	16,116,217
San Diego [f]	1,444,626	328,835	446,925	647,516	21,350

[a] Includes dry cargo and petroleum and petroleum products.
[b] Includes only imports and exports related to foreign countries.
[c] Includes all coastwise, intercoastal, and noncontiguous traffic with Unlted States ports, continental U. S. and otherwise. Excludes intraport, local and internal traffic.
[d] Includes the Ports of Eureka, Carquinez Strait, San Pablo Bay, Richmond, Oakland, Redwood City, San Francisco, Moss Landing, Monterey, San Joaquin River, Stockton, Sacramento, Suisun Bay Channel, Crescent City, and other San Francisco coastal ports.
[e] Includes the Ports of Los Angeles, Long Beach, Newport Bay, Santa Barbara, Morro Bay, El Segundo, Santa Monica, Port Hueneme, Ventura, Carpinteria, Ellwood, Capitan, Gaviota, San Luis Obispo, Estero Bay, Avalon, Huntington Beach, Encina, and other Los Angeles ports.
[f] Ports of San Diego.

SECTION L.

PUBLIC UTILITIES

This section presents statistics summarizing the operations of public utilities in California. Table L-6 and L-7 cover telephones placed by both Pacific Telephone and the Independent Telephone Companies. Tables L-8 to L-10 present typical monthly utility bills in selected California cities. More detailed data on any of the utilities can be obtained from the Public Utilities Commission.

[a] Certain data, including all irrigation data, corrrected since publication of 1963 edition of California Statistical Abstract.

[b] Includes all rural use other than irrigation.

[c] Includes energy used for pumping by the U.S. Bureau of Reclamation for the Central Valley Project.

[d] Includes energy used by Metropolitan Water District of Southern California for pumping Colorado River water through its main aqueduct, as well as use by other public agencies, railroads and street railways, and by electric utilities for plant operation.

[e] Equivalent subdivision of commercial and industrial use not available.

Note: Total quantities shown in this table differ from those in Table L-1 for two reasons. In the first place, some of the energy used in California is generated outside the State (and vice versa). Second, and more important, transmission and distribution losses are not included in the present table.

Source: Federal Power Commission, Regional Office, San Francisco, records; records of agencies indicated in footnotes [c] and [d].

SECTION M.

TRADE AND SERVICES

This section presents information on wholesale and retail trade in California as these are reflected in the Census of Business and taxable sales data, and on services as reflected by census data and the licensing activities of the state agencies which examine and license professional and vocational personnel and establishments.

Tables M-1 through M-4 and M-15–M-16 summarize 1963 Census data on wholesale trade, retail trade, and selected services in California. Additional information is available from the final census reports for the State, issued by the U.S. Department of Commerce, Bureau of the Census.

Total wholesale trade figures include merchant wholesalers (also shown separately), manufacturers' sales branches, petroleum bulk terminals, merchandise agents and brokers, and assemblers of farm products. The merchant wholesaler group is by far the largest of these, accounting for 71.3 percent of all wholesaling establishments and 44.1 percent of all sales. Merchant wholesalers include all establishments primarily engaged in buying and selling merchandise on their own account.

Retail trade data cover all items sold through retail outlets or by nonstore retailers. The latter group includes mail-order houses, merchandise vending machine operators and direct (house-to-house) selling organizations. Retail trade figures from the 1963 Census therefore differ substantially from the taxable sales data, which exclude any items not subject to the California sales tax—notably food for home consumption and gasoline. The number of retail establishments is based on those in operation during November, 1963, and is lower than the number of taxable sales permits issued during the year. The latter category not only includes retail firms that have gone out of business during the year, but also manufacturers, wholesalers, and itinerant vendors making retail sales.

Service data include only major activities, which, however, account for most of the persons engaged in the service sector: hotels, motels, and tourist camps; personal services; miscellaneous business services; automobile and miscellaneous repair services; motion pictures; and other amusement and recreation services. These activities are reported essentially in their entirety. Excluded are medical, legal, and educational services; museums, art galleries, and botanical and zoological gardens; nonprofit membership organizations; and private household and miscellaneous services.

Taxable sales data. Detailed statistics are given in tables M-6 to M-14 on the number of outlets and the amount of taxable transactions of establishments licensed by the State Board of Equalization to sell tangible personal property. The data are shown for retail stores classified by the type of business, for personal service establishments, for contractors and manufacturers and wholesalers of building materials, and for all other outlets. Data are shown for two or more years by type of business for the State as a whole, totals for each county and city, and also by type of business for each of California's 8 most populous counties and for 38 cities and 19 counties whose annual retail store sales in 1965 exceeded $100 million. In general, outlets are classified according to the seller's principal line of business, using the Standard Industrial Classification developed by the United States Bureau of the Budget. Certain types of businesses selling only merchandise not subject to sales tax are not licensed and, consequently, are not represented in the statistics. The principal exclusions are establishments selling only food for home consumption, such as produce markets, meat and seafood markets, poultry stores, dairy stores, bakeries, etc.

The machine tabulations forming the basis for taxable transactions shown in the tables that follow were understated for the third and fourth quarters of 1965 because of sales tax reporting problems stemming from legislation that became effective on August 1, 1965. This legislation required taxpayers whose taxable transactions exceeded $17,000 in either the first or second month of a quarter to pay 90 percent of their state sales tax receipts for such months on or before the 25th of the ensuing months and to file their quarterly returns on or before the 25th of the month immediately following the end of the quarter. Difficulties arising from the handling of the new prepayment forms and quarterly tax returns prevented completion of paperwork requisite for machine processing of a sizeable number of tax returns. Consequently, a portion of the taxable sales data was not included in the machine tabulations. In order to present an accurate picture of retail sales for 1965, the tax returns excluded from the machine tabulations were manually tabulated and adjustments were made to correct the detailed data shown for the State as a whole, the total for each county, and the detail for each of the 38 cities whose taxable transactions exceeded $100 million in 1965. The deficiencies for each of the 27 counties for which detail is printed are shown as unallocated amounts. No adjustments were made to the detail for any county nor for any city except the 38 largest.

The taxable transactions of retail stores may not be the same as their gross receipts because not all of their transactions are subject to sales tax. The principal exemptions from the tax are the sales of (a) food for home consumption, (b) gasoline, which is subject to the motor vehicle fuel license tax, (c) utility services when delivered to consumers through mains, lines, or pipes, (d) animal life used for human consumption, (e) feed, seed, plants, and fertilizers when used for

the production of food for humans, (f) newspapers and periodicals, and (g) prescription medicines. For a complete list of exemptions see Sections 6351 through 6422.1 of the Revenue and Taxation Code of California. Also not included in taxable transactions are service charges, a source of receipts of many retail stores and all service establishments.

The statistics include purchases of equipment, fixtures, supplies, and material from outside of the State on which use taxes are reported and paid by the purchasers.

The Board of Equalization publishes quarterly reports containing outlet and taxable sales data by type of business for the State as a whole, for 56 counties and for 168 of the largest cities of the State as determined by the dollar volume of taxable transactions during the preceding calendar year as reported by retail stores. It also publishes outlet and taxable sales data for retail stores and for all outlets for each of the 398 cities. Since 1960 an Annual Report of outlet and taxable sales data has been issued by the board. This series contains detail on taxable sales by type of business for 240 cities.

Licensed professional and vocational personnel and establishments. Statistics are presented giving the numbers of licensed professional and vocational personnel and the licensed establishments based on operating statistics of the Department of Professional and Vocational Standards. The growth of activity in the licensed professions and vocations can be inferred from the data presented, but it must be noted that no direct measure is available of the volume of professional and vocational services provided by the licensees.

1965[b]	31,908,172	7,192,736	7,735,912	8,049,376	8,930,148

[a] Self-assessed taxable sales reported by concerns doing business in California and self-assessed purchases of Californians subject to use tax. Does not include board-assessed sales, which over the period covered by the table ranged from $20,000,000 to $110,000,000 a quarter. Does not include sales of gasoline and other high-test motor vehicle fuel, sales of food for off-premises consumption, sales of water, electricity, and gas when delivered through pipes or wires, and other tax-exempt sales.

[b] Third- and fourth-quarter figures have been adjusted to correct the deficiencies described in the introduction to this section.

[a] Includes all manufacturers, wholesalers, and retailers of tangible personal property except those dealing solely in commodities (such as cereal products) the retail sales of which are exempt from tax.

[b] Sales or purchases made, with minor exceptions, during the calendar year.

Board of Equalization
Research and Statistics

[c] Excludes tax-exempt retail sales comprised principally of sales of food for off-premises consumption, gasoline, and effective January 1, 1962, prescription medicines.

[d] The 1965 sales data for each class of business have been carefully adjusted to correct the deficiencies described in the introduction to this section.

Unallocated	--	--	--	22,275	--	--	--	16,133

[a] Sales or purchases made, with minor exceptions, during the calendar year.

[b] Excludes tax-exempt retail sales comprised principally of sales of food for off-premises consumption, gasoline, and effective January 1, 1962, prescription medicines.

[c] County totals have been adjusted, as indicated in the introduction to this section, to the correct amounts. The adjustments are shown as unallocated amounts because they could not be allocated to type of business.

[a] Sales or purchases made, with minor exceptions, during the calendar year.

[b] Excludes tax-exempt retail sales comprised principally of sales of food for off-premises consumption, gasoline, and effective January 1, 1962, prescription medicines.

[c] County totals have been adjusted, as indicated in the Introduction to this section, to the correct amounts. The adjustments are shown as unallocated amounts because they could not be allocated to type of business.

Board of Equalization

Building material and farm implement stores	1,088	1,319	1,807	1,894	3,924	3,180	3,213	4,208
Motor vehicle dealers	1,478	9,917	11,978	12,058	15,320	36,691	40,683	40,583
Service stations and auto supply stores[b]	1,383	2,277	2,518	2,415	1,978	3,263	3,664	3,670
Other retail stores	2,411	4,467	5,755	7,271	4,530	9,803	10,683	12,268
Business and personal services	943	1,596	1,805	2,225	2,190	4,254	4,100	3,541
Manufacturing, wholesaling, contracting, and misc. outlets	1,602	4,394	3,087	3,227	12,695	22,845	21,692	18,218

[a] Sales or purchases made, with minor exceptions, during the calendar year.
[b] Excludes tax-exempt retail sales comprised principally of sales of food for off-premises consumption, gasoline, and effective January 1, 1962, prescription medicines.
[c] The 1965 figures for these 38 cities have been carefully adjusted to correct the deficiencies described in the introduction to this section.

TABLE M-14

APPARENT CONSUMPTION[a] OF ALCOHOLIC BEVERAGES IN CALIFORNIA, BY TYPE OF BEVERAGE, 1950–65

(In thousands of gallons)

Year	Beer	Still wines		Sparkling wine	Distilled spirits
		14 percent alcohol or less	Over 14 percent alcohol		
1950	162,484	6,909	14,535	293	18,592
1951	168,226	7,140	12,958	290	18,773
1952	175,512	7,852	15,227	292	19,025
1953	182,269	8,532	16,900	350	19,708
1954	181,095	9,176	15,453	341	19,704
1955	185,740	10,008	15,848	463	20,953
1956	195,446	10,358	17,024	560	22,571
1957	203,349	10,575	16,978	619	23,010
1958	217,086	11,338	17,247	659	23,757
1959	230,439	11,983	17,687	804	20,019
1960	232,402	15,201	17,006	915	27,456
1961	238,306	16,435	17,828	996	29,243
1962	251,695	17,464	16,696	1,074	31,304
1963	265,779	19,441	16,646	1,204	32,509
1964	281,916	21,291	16,596	1,502	35,654
1965	290,277	23,134	16,379	1,730	37,261

[a] Except for tax-exempt distributions of beer to the armed forces which have been included in beer distributions, the figures in this table represent taxable distributions and are compiled from the monthly tax returns of the taxpayers. Because the tax liability attaches at the time alcoholic beverages are sold by manufacturers or importers rather than at the time a retail sale is made or when the consumption occurs, the above data are referred to as *apparent* consumption figures rather than as *actual* consumption figures.

Department of Professional and Vocational Standards

SECTION N.

BANKING AND FINANCE

This section presents bank, savings and loan association, and insurance statistics.

The bank statistics were supplied by the State Superintendent of Banks. The savings and loan statistics were made available by the Federal Home Loan Bank of San Francisco. Additional data may be obtained from these sources.

The State Superintendent of Banks issues an annual report on the financial condition of State Banks.

The insurance statistics are prepared by the California Department of Insurance. Detailed information is published in the Annual Report of the Insurance Commissioner, available from the Department.

SECTION O.

PUBLIC FINANCE

Data relating to the financial operation of governmental agencies in California are summarized in this section. The information is arranged according to the level of government, starting with the Federal and running through special districts. In general the purpose is to present figures on revenues, expenditures and debt, with additional details on each of these subjects where these can be readily prepared in summary form. Supplementary information is available in the files and records of the several contributing agencies.

A warning should be given against adding either revenues or expenditures of the several governmental levels and treating the result as the aggregate income or outgo of governments in California. A great deal of money passes from one level to another in the form of subventions and other intergovernmental payments. Consequently there is a substantial duplication in these figures which can be eliminated only after careful examination of the various items involved. Differences among governmental agencies in accounting practices, especially in regard to disbursements from proceeds of bond issues, also will require attention in using these data.

Federal taxation and expenditures. Annual reports of the United States Commissioner of Internal Revenue are the source of statistics on Federal tax collections in California. Collections within a particular state are not an accurate measure of the burden of Federal taxes paid by the people of that state. For example, 60 percent of the cigarette tax is collected in North Carolina and more than 80 percent of the motor vehicle excise tax is paid in Michigan. But the burden of these taxes is carried by cigarette smokers and vehicle users in all states. The ratio of Federal tax collections to the burden of Federal levies varies with changes in the tax structure, economic conditions and other factors. In general, however, the burden upon Californians exceeds the volume of Federal taxes collected here by ratios ranging between 10.4 percent [1] and 17.4 percent.[2] One of the most recent surveys indicated that in 1957-58 the estimated burden of Federal taxes in California exceeded gross collections by 13.6 percent.[3]

Data on Federal tax refunds, by states, are available for the last four fiscal years and they show an average refund of 9 percent of gross collections in California. This ratio should be kept in mind in connection with the data in Tables O-1 and O-2 which are reported on a gross basis.

Complete data on Federal expenditures by states are not available, but payments by the Federal government to state and local governments and transfer payments to individuals, organizations etc. are reported by states in the *Annual Report of the Secretary of the Treasury on the State of the Finances.* Amounts for California in selected recent years have been transcribed in two tables for this section. Attention is directed to the numerous footnotes in each annual report which because of space limitations cannot be repeated in this Abstract.

1965	10,443,242	7,423,957	1,644,593	346,565	1,028,127

[a] Receipts in the various states do not indicate the Federal tax burden, since taxes collected in one state are, in many instances, borne by residents of another. For example, the withholding taxes reported by employers situated near state boundaries include substantial amounts withheld from salaries of employees residing in neighboring states. Data for 1961 through 1964 indicate that approximately 9 percent of gross collections in California are refunded.

[b] Individual income and employment taxes, reported separately through 1951, cannot be segregated in recent reports.

General note: Original reports from which these data were compiled contain extensive footnotes. These should be consulted by users interested in continuity of these series, comparability and other details.

State revenues, expenditures and bonded debt. The summaries here presented are based upon budget classifications of State revenues and expenditures, with total income and outgo carried back to the 1929-30 fiscal year and detail provided for the period since 1950. Additional information may be obtained from the *Annual Report of the State Controller* and the *State Budget*. The last two entries shown in each table are estimates contained in the Governor's Budget as submitted to the Legislature.

Aggregate fiscal year revenues, segregated by general and special funds, are shown in Table O-5. For the most part, general fund receipts are derived from broad levies and charges not earmarked for particular purposes, while special fund receipts are dedicated for use in special services. Sales, personal income and corporation taxes are examples of the former; motor vehicle taxes and fees, which must be used for activities related to highways, roads and streets, are the leading special fund levies. Receipts from some revenue sources are apportioned by law between the general fund and certain special funds. Since 1929-30 there have been a few changes in the fund designation of receipts, and in this respect the totals are not strictly comparable throughout the period covered.

Table O-6 shows revenue collections from each of the principal sources, without regard to fund. Amounts represent accruals during the year to the collecting agency. Permit fees required in connection with such levies as the sales and motor vehicle fuel taxes are included with other receipts from these levies.

Expenditure data are summarized in accordance with the three principal sections of the budget; (1) State operations, which includes the expense of maintaining the various departments, boards, commissions and offices—including the legislative and judicial branches; (2) capital outlay—representing the cost of acquiring land, constructing and equipping new facilities, highway construction and similar expenditures; and (3) local assistance, which comprises State payments to local governments. Under State accounting practice, disbursements from proceeds of bond issues are treated as expenditures at the time the bonds are redeemed. Hence, initial payments from bond funds are not included in these totals.

TABLE O-2

INTERNAL REVENUE COLLECTIONS IN CALIFORNIA, BY PRINCIPAL SOURCE, SELECTED YEARS, 1950 TO 1965

(In thousands)

Department of Finance
Budget Division

Expenditures for the principal functions of government include amounts for all three of the general purposes mentioned above—State operations, capital outlay and local assistance.

The functional classification of State expenditures was revised in 1962 in order to conform this reporting so far as possible to the agency concept of governmental organization. The new classification is shown in Table O-8. Detailed information regarding the activities and services comprising each function may be obtained from budget summaries.

Information regarding the State's bonded debt, as reported by the State Treasurer, is arranged to show both the general trend since 1950 and a detailed statement of the California State bonded debt as of June 30, 1965. Short term obligations are not included.

The State Treasurer and the California Bonding Picture—The State Treasurer has duties and responsibilities set forth both by the Constitution and by statute. Serving as banker for the State he receives all state revenues into the State Treasury and provides for the redemption of all state warrants. His responsibility includes the determination of the cash needs of the State on a daily basis and for the investment of all surplus funds.

Department of Finance
Budget Division

The investment earnings on the funds and accounts invested by the Treasurer earned in excess of $50 million during the 1965–66 fiscal year. Interest earned on investments is credited to the general fund and other funds of state government as provided by law.

The trust functions of the State Treasurer's Office, providing for the safekeeping of all state-owned securities and other personal property, increased steadily during the year. On June 30, 1966, securities held for state funds, deposited by banks to secure bank deposits and all pledges with state agencies and other safekeeping items, totaled over $5.8 billion.

All state general obligation bonds authorized by the people are prepared, sold, serviced and redeemed by the State Treasurer. Of the $3.8 billion bonds outstanding on June 30, 1966, approximately two-thirds are represented by self-liquidating bonds serviced by certain earmarked receipts other than general tax sources. In the 1965–66 fiscal year, state bond sales totaled $625 million. The bids received on bond offerings continued to compare favorably with the national municipal bond averages.

Water Development Program Bonds—A total of $550 million of the $1.75 billion general obligation bonds authorized by the voters in 1960 under the Burns-Porter Act had been sold as of June 30, 1966. The Burns-Porter Act dedicates certain revenues of the project, remaining after provision for the expense of operation, maintenance and replacements, to the payment of the principal of and interest on the Water Bonds.

State School Building Aid Bonds—The continued population growth contributes to the demand for additional new classroom facilities for local elementary and high schools. The loans to local school districts remain fairly constant. Since its inception in 1947, more than 51,700 classrooms housing 1.7 million pupils have been provided under this program. By June 30, 1966, a total of $1.505 billion in school building aid bonds had been sold of the $1.890 billion authorized by the electorate starting in 1949.

State Construction Program Bonds—The population growth combined with the accumulated need to modernize and replace existing older facilities required a construction program of a magnitude unmatched by any other state. A total of $830 million of Construction bonds had been sold as of June 30, 1966, of the $1.1 billion authorized.

Veteran's Farm and Home Loan Bonds—This program has been entirely self-supporting since its inception, with the administration costs, bond redemptions and interest payments covered by veterans loan repayments. Since 1921 over 230,000 loans have been made to qualified California Veterans. As of June 30, 1966, $1.340 billion of the Veteran's bonds sold remain outstanding.

Harbor Development Bonds—Of the $60 million bond issue authorized by the voters in 1958, for harbor development, $50 million was designated for the San Francisco Port Authority. On June 30, 1966, $17.5 million of the authorized bonds remained unsold.

Ten million dollars of the 1958 issue was made available for loans to cities, counties and districts for small craft harbors and related facilities. These bonds are also self-liquidating, as the revenue received for operation of the small craft facilities will repay the principal and interest on the bonds.

State Beach, Park, Recreational, and Historical Facilities Bonds—During 1965 the first bonds were offered for sale of the $150 million program to acquire and develop the state's outdoor recreational facilities approved by the people in 1964. The program provides that $85 million will be allocated for acquisition of property for the state park system and $40 million for grants to local governments for acquisition and development of property for park and beach purposes. In addition $20 million would be made available for minimum development of the property acquired for the state park and beach system, and $5 million to acquire and develop property for wildlife management.

est. Estimate.

Source: Data for 1930-45 from *Biennial Report of the State Controller,* except capital outlay for highways, not segregated in the Controller's reports, from *Seventh Annual Report of the Division of Highways,* page 234. In determining highway capital outlay, contributions from non-State sources were excluded. The resulting estimate for each year was deductsd from total highway expenditures as reported by the Controller, and the remainder was treated as maintenance, administrative expense, etc., included under "State operations." Data for the period since 1945 from Stats budgets. All figures adjusted to present budget classifications.

[a] The functional classification of State expenditures was revised in 1962 to conform more closely to the agency concept of governmental organization. For years prior to 1962, figures have been revised to fit the new categories. Principal changes effected in Table O-8 are: (1) the inclusion of bond interest and redemption under the functions for which the debt was incurred, rather than in "Other" expenditures; (2) inclusion of the Department of Mental Hygiene under "Health and Welfare," rather than combining these expenditures with those of the Departments of Corrections and Youth Authority; (3) combining under "Public Safety" the Disaster Office, Department of Justice, Military Affairs (all formerly classified as "Other" expenditures), Veterans Affairs and Fire Marshal (both formerly in "Social Welfare and Public Health"); (4) showing as "Business and Commerce" the expenditures of regulatory and licensing agencies (formerly in "Other"); and (5) showing separately as "Employment Relations" the Department of Industrial Relations and expenditures from State funds by the Department of Employment.

[a] Excludes special assessments levied on limited categories of property to finance activities from which such properties derive special benefits.

[b] County levies for school purposes, such as junior college tuition and countywide school levies, are included with school district levies.

Note: Ad valorem taxes are levies on all taxable real and personal property as it exists at 12 o'clock noon on the first Monday in March. To the assessed valuation of taxable property are applied the tax rates of the several taxing jurisdictions within which the property is situated.

[a] Includes utility roll, and locally-assessed secured and unsecured rolls at county assessment levels.

[b] Includes junior college tuition levies and levies for recovery of school equalization aid loss.

[c] Excludes special assessments levied on limited categories of property to finance activities from which such properties derive special benefits.

[d] Numbers may not add to totals because of rounding.

[e] Computed by dividing total levies by the assessed value and multiplying by 100.

TABLE O-18

AVERAGE TANGIBLE PROPERTY TAX RATE,[a] BY LEVEL OF GOVERNMENT, 1951–66

(Rate per $100 of assessed value)

Fiscal year	Total levies[b]	City and County of San Francisco levies	Other county levies[c]	Other city levies[d]	School district levies[c]
1950–51	5.81	4.67	2.02	1.72	2.36
1951–52	5.74	4.52	1.88	1.71	2.42
1952–53	5.79	4.13	1.86	1.69	2.52
1953–54	5.94	4.47	1.94	1.73	2.54
1954–55	6.15	5.14	1.97	1.72	2.67
1955–56	6.27	5.25	2.04	1.67	2.72
1956–57	6.49	5.10	1.93	1.66	3.05
1957–58	6.72	5.26	1.99	1.61	3.32
1958–59	6.96	5.61	2.06	1.56	3.37
1959–60	7.26	5.95	2.11	1.61	3.56
1960–61	7.42	6.18	2.11	1.59	3.69
1961–62	7.65	6.13	2.13	1.58	3.89
1962–63	7.82	6.83	2.18	1.60	3.97
1963–64	8.00	6.29	2.20	1.61	4.12
1964–65	8.31	6.39	2.29	1.61	4.31
1965–66	8.53	6.91	2.33	1.58	4.46

[a] Computed by dividing the total taxes levied by each level of government by the net total assessed value of tangible property within its jurisdiction.
[b] Includes the rates of special district taxes, which are not separately shown.
[c] County levies for school purposes, such as junior college tuition and countywide school levies, are included with school district levies.
[d] Computed by dividing city tax levies by the assessed value of tangible property inside cities as shown on county assessment rolls. Slightly lower rates would result from the use of assessed values as shown on city assessment rolls in the cities which do their own assessing. For example, in 1962–63, the average city rate was $1.54 when computed by the latter method.

[a] The information in the series is not strictly comparable. For the fiscal years through 1952–53 information is taken from the report prepared by counties, including only selected districts and not, in all cases, all of the information concerning the activities of a given district. For the fiscal years 1953–54 to date, the information is taken from separate reports of the financial transaction of districts. For districts other than school districts, the types of districts included were increased from fiscal year 1953-54 through 1955-56 as the program of the reporting for districts was expanded. The figures for bonded indebtedness include time warrants as well as certain long term contractual obligations between special districts and the Federal Bureau of Reclamation.

[b] Indebtedness for school and special districts from fiscal year 1953-54 to date include school purpose bonds which are an obligation of the City and County of San Francisco and not of the school district. Listing within this table is for information purposes only. For 1953-54, $44,405,000; 1954-55, $45,826,000; 1955-56, $43,147,000; 1956-57, $41,458,000; 1957-58, $44,289,000; 1958-59, $44,115,000; 1959-60, $46,840,000; 1960-61, $44,990,000: 1961-62, $44,225,000; 1962-63, $38,690,000; 1963-64, $33,015,000; 1964–65, $29,275,000.

Office of State Treasurer

SECTION P.

ELECTIONS

Information relating to registrations and voting is presented in this section. In interest of space the data are limited to registrations, by principal political parties, the total vote cast, and a statement of the vote for major candidates for the offices of President, United States Senator from California, and the constitutional officers of this State. A complete accounting of registrations, the vote for all candidates (including representatives in Congress, State senators, assemblymen and judicial officers) and the vote cast for and against all ballot propositions is given by the Secretary of State in *Statement of Vote*, a booklet issued after each primary and general election.

All eighty members of the Assembly and all forty State senators will be elected in 1966. Senators from odd-numbered districts, 1 through 39, will be elected for a 2-year term. In 1968 they will be elected for 4-year terms. Senators from even-numbered districts, 2 through 40, will be elected for 4-year terms, their next election being in 1970. Thus, beginning in 1968, one-half of the senators will be elected for 4-year terms every two years. Constitutional officers are elected for four-year terms in the even numbered years which are not leap years. There is a vote on high elective office, either presidential or gubernatorial, at each general election.

According to reports of the United States Bureau of the Census, there were 7,092,000 civilians in California aged 21 years and over on April 1, 1950. Registrations for the general election of that year totaled 5,244,837 and there were 3,845,757 votes cast. Registration for the general election of 1964 totaled 8,184,143 and there were 7,233,067 votes cast. It must be recognized that civilian population and registrations are not entirely comparable. Some individuals of proper age do not possess other voting qualifications and members of the Armed Forces may vote, if they have the residence and other qualifications. However, these population figures provide a general background against which to interpret registration and voting data.

TABLE P-1

REGISTRATION AND VOTE CAST IN CALIFORNIA, PRIMARY ELECTIONS, 1930-66

Percent of vote cast: 64.67

Secretary of State.

SECTION Q.

COMPARATIVE STATISTICS

This section compares California with the other 49 states and the entire United States for several major economic indicators: resident population; nonagricultural employment; hours and earnings in manufacturing; personal income; defense-aerospace contracts; manufacturing activity; wholesale and retail trade; selected services and agriculture.

Population data are summarized from the Bureau of the Census, *Current Population Reports* (P-25, No. 317). Employment and hours and earnings series are taken from *The Consumer Price Index,* released by the Bureau of Labor Statistics. Personal income data were published in the August 1966 issue of the *Survey of Current Business.* Defense-aerospace contracts appear in the Department of Defense (DOD) *Prime Contract Awards by State* (quarterly) and the National Aeronautics and Space Administration (NASA) *Annual Procurement Report.* Data for the manufacturing, trade and service categories are taken from publications covering the 1963 Census of Business, conducted by the Department of Commerce, Bureau of the Census and the 1964 Survey of Manufactures. More detailed information is available by refering directly to the Census reports. Cash farm receipts are published in the *Farm Income Situation* of the U.S. Department of Agriculture.

These tables are not meant as an exhaustive comparison of California with other states, but are designed to illustrate the relative position of the State in several of the more important economic sectors.
